Special Notes.

This page and page 265, 266 and 267 are kept for details of any special goods we have to offer on or about the time of posting this list. Goods are offered subject to being unsold on receipt of order.

"Teekard." This is a good substitute for Moulmein or Rangoon teak for some purposes at about half the price. A sample of this "Teekard" can be had upon application. It is very hard and therefore has a splendid wearing capacity. There are practically no knots in this material, and we consider a "Teekard" block flooring $1\frac{1}{8}$ in. nominal in thickness, *i.e.* about 1 in. finish is more than equal to $1\frac{1}{2}$ in. Pitchpine block.

Special quotations for "Teekard" block flooring on application. Also for dancing or factory floors tongued and grooved long blocks, there is nothing in our opinion to equal the same. This material also can be supplied cut to size or planed, machined to pattern, or made into joinery of any description. There is a natural oil in this wood which will resist the damp and should make almost an everlasting floor when laid on properly floated concrete and stuck down with our bitumen mastic (see page 233). For Moulmein, Rangoon or Teak of equal quality see prices page 243.

Teak. Special line of logs in stock 10 to 25 ft. long 12×12 . Send for details. Also see page 243.

$1\frac{1}{4}$ in. Canary Whitewood, 10 in. and up wide, good quality, average 11 in. wide $3\frac{3}{4}$ d. ft. super as 1 in. Special price for wide boards.

2 in. Black Walnut, average 6 in. wide, good dry parcel medium quality, from 6 d. ft. super as 1 in. Common from 3 d.

2 in. Dry American Oak Boards, good medium quality average 8 in. wide, from 4 d.

Special Stock of 200 well-seasoned Doors, (Archangel red framing framed up ready to wedge over a year). Design No. 53, 6 ft. 8 in. \times 2 ft. 8 in. \times 2 in. (see page 29), at a reduction off list to clear lot, or for lots of 25.

Oak Pales.

(Cleft and Sawn).

We omitted quoting at per 100 palings in Fencing Section, so quote herewith:—

CLEFT PALES—Approximate width		Sawn to 4 in. wide (or wider at proportionate price.)	
	3 inch.		
3 ft. 0 in.	18/-	...	17/-
3 ft. 6 in.	20/-	...	20/-
4 ft. 0 in.	24/-	...	23/-
4 ft. 6 in.	27/-	...	26/-
5 ft. 0 in.	30/-	...	29/-
5 ft. 6 in.	36/-	...	33/-
6 ft. 0 in.	44/-	...	37/-

We always reserve the right to send any width pale suitable from our stock unless instructed to the contrary.

Sawn Oak Posts.

(Pointed or Bevelled Tops).

5 in. x 4 in.	6½d.	ft. run.
4 in. x 4 in.	5½d.	"
4 in. x 3 in.	4½d.	"

Sawn Oak Angle Rails.

(See page 203 for Illustration.)

As No. 4024	3d.	ft. run.
" " 4023	2½d.	"

TO OUR READER.

DEAR SIR,

In publishing this List, we do so with the object of bringing before the notice of Architects, Builders, Contractors and Merchants our Stock of **WOOD GOODS** of all descriptions; and wish to point out that we can manufacture

DOORS, WINDOWS, MOULDINGS and WOODWORK

all description, to compete against any Wood-workers in the World. Distance no object.

Prices can be given **Free on Board Avonmouth New Dock, Bristol.** Lines of vessels direct to nearly all parts of the world from our Docks.

Also quotations can be given C.I.F. to any port in the world where communication with a regular service of boats is available.

We have condensed a lot of information, and yet retained our previous idea of keeping size of list to a pocket size.

Awaiting your enquiry and order,

Yours truly,

C. JENNINGS & CO.

Sometimes a Special kind of wood is required to suit the climate; sometimes a wood that will resist the attack of insects. State what is wanted, and we can quote.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

SOME PRICES ADVANCED

TERMS FOR EXPORT ORDERS.

TERMS.—50% of total amount as deposit with Order, and balance nett+ cash against documents when boat reaches port arranged for; or 2% allowed off the whole if cash is sent in total with Order to cover freight as well. Any cash sent to us in advance will be duly accounted for, and should the amount sent be in excess of correct charges, we will return same.

SPECIAL TERMS will be duly considered by us where such are required.

REFERENCES of our capabilities may be obtained from our Bankers—Capital and Counties Bank, Bristol.

FREIGHT has to be prepaid generally, so we have given below approximate costs of freights, and information relative to our export trade, so that you may calculate what cash to send to us. Prices in list are Free alongside vessel Bristol Docks, but will quote carriage paid for any quantity on receipt of full enquiry.

QUESTIONS will be replied to promptly. Do not fail to ask us anything you wish to know.

GENERAL MERCHANDISE (not shown in our list) can be shipped by us with any Orders, if you give us detailed instructions.

APPROXIMATE COST OF FREIGHT.

to.....	will be.....	to include all the expenses.
Freight .. 30/- ton of 40 cubic ft.	This basis at 30/- freight will help	
Plus .. 3/- ton primage 10%.	you to calculate on any price freight by	
Insurance,	deducting or adding the correct per-	
etc., about 2/- " " 40 cubic ft.	centage. We will quote you the	
	freight to any port if you will give us	
Total 35/- per 40 cubic ft., or	your enquiry. Where possible, we shall	
10½d. per cubic ft. nett.	fill in the current freight when de-	
	spatching these lists.	

The carriage per door at above freight basis will cost as under if packed, or about 10% less carriage if unpacked, as doors are frequently sent loose, and buyers take the slight risk of damage, and so save the extra cost of freight on the space the packing will take up, and also save the cost of packing.

Sizes of Doors.			Doors to Sections A, B, or C.	Section N Raised Mould.
Height.	Width.	Thickness.		
6 ft. 4 in.	2 ft. 4 in.	1½ in.	1/4 per door nett.	
6 ft. 6 in.	2 ft. 6 in.	1½ in.	1/6 " "	
6 ft. 4 in.	2 ft. 4 in.	1½ in.	1/7 " "	
6 ft. 6 in.	2 ft. 6 in.	1½ in.	1/9 " "

6 ft. 10 in.	2 ft. 10 in.	2 in.	2/10 " "	3/3 " "
7 ft. 0 in.	3 ft. 0 in.	2 in.	3/- " "	3/7 " "
				3/10 " "

If doors as section N, page 11, are supplied as section A, page 11, and the raised bolection moulding mitred and fitted, sent loose ready for nailing and packed between the doors (taking up less room than if it was nailed in), the carriage would only be the same as for doors, section A, B, C above; and, also, 6d. per door could be allowed off of 4-panel doors, and 9d. per door off of 6-panel doors, to allow for nailing in same at destination by importer off prices shewn on Pages 10 and 11.

Boat Carriage on Windows is determined by the kind of window required. Sliding windows prepared for weights, as No. 1000, page 42, take up a lot of room, as shewn by section 1003 on page 42, by reason of the box casings; but the sashes only could be despatched already glazed, packed in a small space, whereby the carriage would not be so expensive.

The Box Cased Frames could be sent, however, with the sash weights, fitted in same for reducing space.

SLIDING WINDOWS can be Packed in various ways. 1st is most economic to save freight.

- 1st. All material in the knock-down, *i.e.*, only fitted glass packed in crates. Iron weights, sash fasteners, and cords packed in crates.
- 2nd. Boxed sash frames in the knock-down, and fitted only. Sashes made and glazed. Iron weights and cords and fasteners packed in crates.
- 3rd. Made complete, sashes glazed and fitted and left in frames, with weights and cords all attached, and sash fasteners fitted on ready for use.

Casement windows (solid frames and sashes as page 53) can be packed in similar ways, but remarks relating to the sash weights would not apply.

Spaces between goods can always be filled with other small articles of any kind, such as ironware, etc.

Carriage on any other goods can be calculated by measuring up the cubic contents, taking care to allow for packing material (where required) in your measurement. Glass or smaller articles can always be supplied to fill in spaces of woodwork.

PACKING.—As above mentioned, we have to charge the small amount of about 5% for packing goods, to cover the necessary material, etc.; but where quantity is large our charges for packing may be less.

Where a price is quoted for schedule of work or a lump sum named for a number of articles, the quotation is given on the definite understanding that we can demand remittance for any portion when ready for despatch. Where monthly account is arranged the approximate value of any portion of Order sent to be invoiced on the date of despatch.

PAINTING can be arranged on any goods to be shipped by us if stated, also paint material can be shipped with any goods if required.

DIFFERENT NAMES for the same kind of wood sometimes lead to a misunderstanding. We should like to call your attention to the fact that all Joinery (unless otherwise mentioned, as in the case of doors we reserve the right to use panels of any wood we consider suitable. The kind of wood we should use can be stated by us when you are placing order with us) is generally manufactured of Deal, which we name "Deal" or "Red Deal"; in some districts it is named "Yellow," "Redpine," "Red Fir."

Canary Whitewood is sometimes named "Canarywood," "Poplar," etc; Yellowpine is sometimes named "Whitepine," "Soft Pine."

If you ever require manufactured woodwork in any special kind of timber which is not described in the list, kindly send us a small piece as sample, and name it by any names you know.

SPECIAL quotations given on application for large quantities of any goods.

C. JENNINGS & CO.,

General Woodworkers,

Pennywell Road, BRISTOL, England.

URGENT ORDERS.—Kindly mark "Urgent" with the date when we shall despatch, and we will try and work to your date. When placing date of despatch on order, take into consideration the time it may take to reach destination, as railway and boat companies do not hold themselves responsible for delays of a few days.

CLAIMS FOR ERRORS must be made on arrival of goods, in Order to enable us to investigate same whilst memory permits.

RETURNS (other than boxes, bags and wrappers) will not be accepted by us unless you receive our instruction to despatch to us.

We cannot be held responsible for errors of description or pricing which may be found in this list. We have been to considerable expense to issue a list containing most detailed information, and will notify you as far as possible on application of any alterations of prices or descriptions which it has been found necessary for us to make.

TELEGRAPHIC CODE.—Our Telegraphic Code inserted in our book can be used in conjunction with the A.B.C. 5th Edition Code—although we can arrange a cypher with our Customers for general use, or can accept Telegrams in any known codes by arrangement.

We have inserted Telegraphic Code on a large number of items to enable Customers to telegraph orders or enquiries where necessary. Do not telegraph when there is time for letter, as Telegraph Authorities will not compensate for any mistake they may make, and any mistakes must be at the risk of the buyer. Confirm telegram by letter immediately; also confirm any telephonic instructions by letter when we have to make or despatch goods.

To **TELEGRAPH QUANTITY** required, take a note of how we quote prices, and order in that way.

The first number you place in telegram will be reckoned as the number of articles, if articles are quoted each; the number of dozens if quoted by the dozen; the number of running feet if quoted by the lineal ft. or 100 feet lineal; the number of square feet if quoted by the square foot; the number of squares if quoted by the squares.

Where our Code might clash with the subsidiary (5th Edition A.B.C., or others) code you use in conjunction with ours when reading your telegram, we shall accept our code for preference.

CODE ILLUSTRATIONS. Every square is counted one word.

840	MBN	840 square feet of special American White, ¾ in. planed to ½ in. finish thickness. If 6 in. to 9 in. required.	246
6	MOA	6 Navvy Wheelbarrows, pattern No. 5025.	236
10½	VCN	10½ squares, i.e. 1050 square feet nominal 7 x 1 planed, tongued, grooved and beaded two sides white.	238

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

DELIVERY free Bristol. Goods sent by steamer are free Docks only. We do not pay Dock dues unless specially arranged. Special quotations can be given carriage paid as required.

We show comparison of Metric System and English Measures. English measures and money is mentioned throughout the list.

LINEAR MEASURE.

Millimetre	=	$\frac{1}{1000}$	of a metre	=	·03937 inches.
Centimetre	=	$\frac{1}{100}$	"	=	·39370 "
Decimetre	=	$\frac{1}{10}$	"	=	3·93707 "
Inch	=	25·399	millimetres.		
Yard	=	914	metres.		
Mile	=	1609·314	"		
Square yard	=	·836	square metre.		

CUBIC MEASURE OR MEASURE OF CAPACITY.

Millimetre	=	$\frac{1}{1000}$	of a litre	=	·06103 cubic inches.
Centilitre	=	$\frac{1}{100}$	"	=	·61027 "
Decilitre	=	$\frac{1}{10}$	"	=	6·19291 "
Litre	=			=	61·02705 "

A litre is a cubic decimetre, this being the unit of capacity.

The "**TWINK**" (registered) Jennings's Patent Rotary Turbine Geyser is built on scientific lines. Water is churned to a fine spray, which enables it to absorb a larger percentage of heat units than is possible under any other system. Bronze ball bearings give long life to impeller fan. Each geyser is provided with a massive stop tap and extra heavy copper cone.

Price :—

No. 2 in copper with three cast-iron feet ..	£3 5 0
Ditto with wall bracket attached, very easily fixed	3 5 0
Extra for polished copper water pipe and union	0 3 6
Water pressure required : from 10 lb. upwards.	

If you will purchase one of these Geysers we are quite sure you will repeat your orders

By the introduction of this patent Turbine Geyser the consumption of gas is reduced to the minimum per gallon of water heated.

Smaller and cheaper quality Geysers at lower prices supplied if quantity ordered is sufficient, as we stock this one size and good quality only at present.

"**ONNEJ**" Gutter Bracket, showing great advantage over any other in price and quality,—details on application. (See page 266).

"**CARBOJEN**" (registered) Wood Preservative (brown), $\frac{1}{6}$ gallon (40-gallon barrel free). Smaller lots, tins extra. Credited in full if returned carriage paid.

Before writing out an Enquiry or Order, kindly read through Pages 1 to

CEMENT. Occasionally we have special lines in two different qualities lying at varying ports of the United Kingdom which we can offer at low prices.

SCAFFOLD ROPES. Quantity of good second-hand, 8d. each, or will loan.

Do not think anything in Timber or Woodwork is out of our line, or that you are too far away (Export terms on application); it is not so! Send your inquiry to:—

C. JENNINGS & CO.

**Pennywell Road
BRISTOL** 

We ask you to accept this list feeling sure that you will find it to contain as varied an assortment of designs as any catalogue issued by other manufacturers in the world.

Our Drying Kilns and Machines are kept up-to-date by making improvements day by day.

We reckon we compete in quality and price against door manufacturers in any part of the world. Therefore, always send us your orders or enquiries.

NOMINAL AND FINISHED SIZES.—All sizes mentioned in this list are nominal, and, as is the custom in the woodworking trade, the actual size is slightly less to allow for planing, etc.

For instance, our doors would hold up, as a rule, about $\frac{1}{8}$ in. under the nominal thickness, and the $1\frac{1}{2}$ -in. door would be about $1\frac{3}{8}$ -in. finish. We point out, however, that our doors hold up a lot thicker than those made by some of our competitors in various parts of the world, and therefore we say they are worth more.

OPTIONAL.—Where possible (especially in urgent orders) give us the option of sending either of two patterns, sizes, or sorts, if you are not absolutely tied to any one detail, as at times our stock may be low in one pattern, but full in another. Word your Order something after this manner." Illustration: "Send 100—6ft. 6in. \times 2ft. 6in. \times $1\frac{1}{2}$ in. four-panel doors, section B, optional section C or optional six-panel." We shall understand this as follows: If we have in stock the 100 doors in four-panel, section B, you would prefer us to send them; but if the stock is low you prefer four-panel, section C. Should stock be low in both these items, we have the option of sending six-panel in sections B or C. We trust this simple illustration will enable you to give us options in the way suggested. Much valuable time may thus be saved.

ON SASH MOULDED DOORS GENERALLY.—The Bead and Butt panel will be flush on the sash mould side not on the rebate side, unless specially arranged. Loose Ovolo Bead can be fitted inside. See Section T, page 11 for about 3d. or 4d. per pane of glass extra.

GLASS.—Where glass is quoted (glazed or otherwise) it is always extra. Prices of doors quoted are in all cases for woodwork only.

PAINTING Woodwork can be arranged where specially required. 1st coat of Priming (including Knotting) about 1/- per door; 2nd coat 1/- (including rubbing down.)

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

IMPORTANT NOTICE.

NOTES WHICH RELATE TO THE WHOLE OF DOORS IN THIS LIST.

- Quality D. All prices in this book are for doors finished on glass paper machine, ordinary quality D, about equal to, or better than the average quality door finished on this kind of machine.
- " C. SELECTED QUALITY, GLASS PAPER MACHINE FINISH FOR MEDIUM CLASS WORK 10d. EACH EXTRA TO PRICES THROUGHOUT THE BOOK. WE RECOMMEND THIS QUALITY FOR ORDINARY WORK.
- " B. Hand-finished for high-class paintwork, 1/8 each extra to D.
- " A. Hand-finished for varnished work (free of discoloured sap and large knots), 3/6 each extra to D.
- " E. A slightly defective quality suitable for very common cottages, 8d. each less than quality D. (We have not always these in stock.)

TELEGRAPHIC ORDERS.—The Post Office will not be responsible for errors in telegrams, so do not telegraph if you can telephone or write us, as any error will be at buyer's risk. If you telephone, confirm next post.

Add on end of Code the quality: thus if you want 6ft. 6in. X 2ft. 0in. 1 1/2 in. D ordinary quality door, squared framed, four-panel (see page 15)

			add D—total code word	JDFD
"	"	A quality door add the word A	"	JDFA
"	"	B " " " " B	"	JDFB
"	"	C " " " " C	"	JDFC
"	"	E defective if in stock " E	"	JDFE

100,000 Doors will be kept by us in our Warehouses at Bristol and other ports, ready for prompt delivery.

We do not always guarantee to stock all doors priced in this list, neither do we bind ourselves to make any which we may not have, but we shall at all times do our best to stock all the doors for which there is a fair demand.

MOULD ON SOLID.—If it is not expressly stated in the Order, we reserve the right to send either section B or C. Where possible, when ordering kindly give us the option to send either section.

ODD-SIZED DOORS.—When you are sending Enquiry, remember that small orders for Odd-Sized Doors cost a lot more to make than stock sizes, and especially is this so in some sections. For instance, to make one odd size door to section A it may cost only 1/6, whereas to section B or C it would cost about 3/6 extra to the next largest stock size above the odd size required; but if 12 odd-sized doors all one size, or 20 doors in several sizes were ordered in section A, the cost would be about 1/- each extra, or B and C about 2/- each. On a lesser quantity it is generally cheaper to have a planted mould as section F, than a solid mould as B or C.

QUANTITIES.—If you are about to erect say 100 or 1,000 houses spread over a period of two years or more, but you prefer goods despatched in small, regular consignments, give your Enquiry for the total, state rate of delivery required, select your pattern doors, and we will contract to supply. Always give us an idea of what you are likely to require in the future as well as for the present, and we will then endeavour always to have the goods you are likely to require in stock.

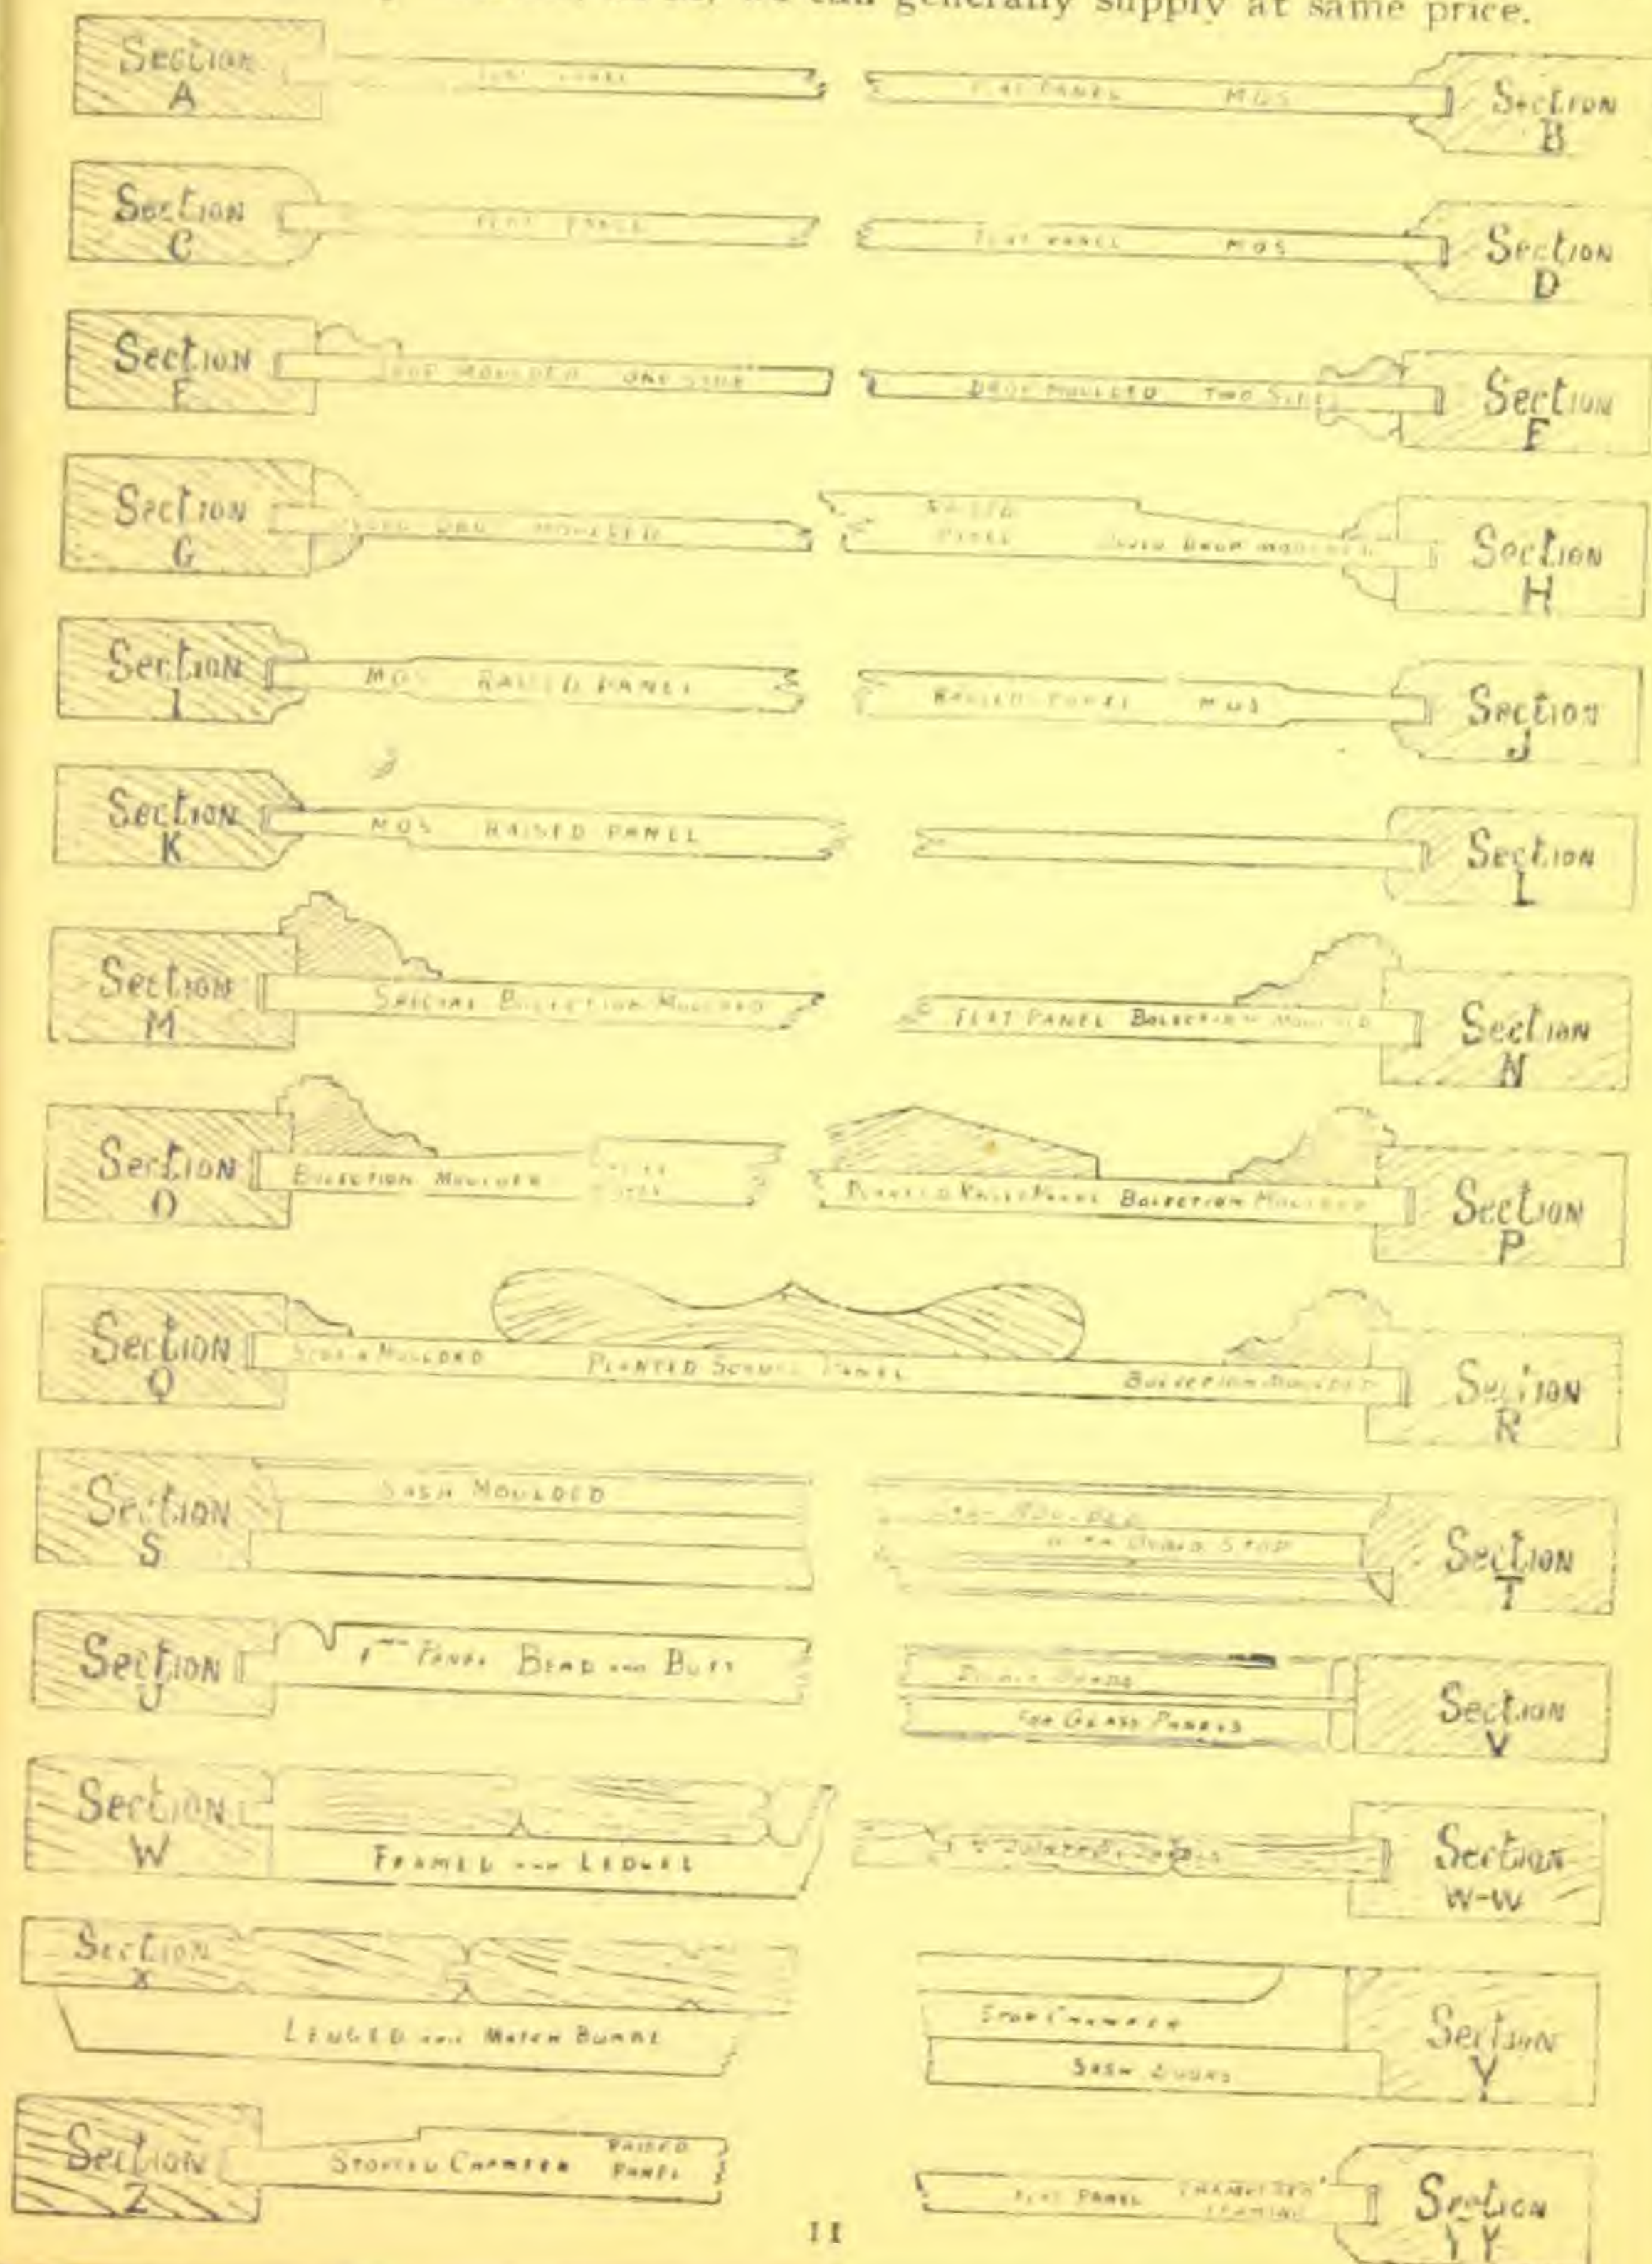

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

SECTIONS OF DOOR FRAMING & PANELS

which we are constantly using. This is the page to which you will refer when you select the section of our stock doors, and odd-sized doors. We reserve the right to alter these sections slightly.

Special sections (not so generally used) on pages 12 and 13. If you prefer doors moulded with a different pattern from those shown below, kindly make your selection from our moulding list, to quote the extra cost.

All bolection mould doors, unless otherwise ordered, are as section N, but if specially ordered, as M, we can generally supply at same price.

SPECIAL SECTIONS, Etc.

Prices of Sections 150 to 158, see page 13.

Section Nos. 150 to 158.

On this page we show various Sections which we do not quote for in General Stock Prices; but at any time if you will send us an Enquiry, stating full details, quantities required, etc., we will quote you either for doors or any description of woodwork to these patterns. The Price of same will absolutely depend upon the quantity (see Remarks foot of Page 10 re Quantities).

No. 200.

No. 201.

No. 201 is a different design to any in our book, so is useful as a fresh design, as well as to show details of the dowels.

We reserve the right to send for any orders a Morticed or Tenoned Door as No. 200, or a Dowelled Door as No. 201, unless you definitely state on the order which is required. Kindly give us the option to send either.

Hardwood Dowels are used in making doors as No. 201, so we can recommend them for strength and reliability.

Front Doors are sometimes in stock (or quantities of twenty can be made) 4-panel (as section Z, page 11), machine stop-chamfered on outside, with raised panels.

6 ft. 8 in. x 2 ft. 8 in. x 1 1/2 in.	13/9
6 ft. 10 in. x 2 ft. 10 in. x 1 1/2 in.	14/9
7 ft. x 3 ft. x 1 1/2 in.	15/9

Flat panels about 2/6 less.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 11.

SPECIAL DESIGNS AND SECTIONS.

No. 203.—This is a design of a 6-panel door, which has all equal panels, and therefore forms a separate design from any other shown in our list. This design is, however, to show that any other pattern in our list can be moulded as sections 150 to 152. No. 150 shows a mould on centre of framing. No. 151 shows a mould on edge of style. No. 152 a mould on each of the two edges of the mullion; but we can mould the whole of door as design No. 203 or parts only, as ordered. One pattern door may look best with styles only

No. 202.

moulded; another may look well with mould on mullions only. You can decide yourself, and the cost added on to the price of a square-framed door will be 1/- per door (twelve doors at least) for 30 ft. of mould, and extra 1/4d. per ft. run of moulding. Thus a 6 ft. 6 in. x 2 ft. 6 in. x 1 1/2 in. 4-panel square, if moulded on both sides of door, will cost:—

2 styles, 2 sides about	..	26 ft.
1 head, 2 sides	..	4 "
1 middle, 2 sides (if in centre)	..	4 "
1 bottom rail, 2 sides	..	4 "
2 mullions (if in centre)	..	10 "
		<hr/> 48 ft.

Cost 1/4 door extra.

Door No. 202 is marked with Key Letters to make clear our name for each part of the door:—

- H. Head.
- M. Mullion or muntin.
- F. Frieze rail.
- L. Lock or middle rail.
- B. Bottom rail.
- S. Style or stile.

No. 204 is a new design. Will be stocked if a sufficient demand is made. Prices if in stock (or if 100 ordered at once to be made special) same prices as on Page 18 for Design 13.

No. 205.—Top is prepared for glass chamfered as section Y. Bottom panel as section P, page 11, including lock rail, mould and apron-piece.

6ft. 8in. x 2ft. 8in. x 2in.	15/9
6ft. 10in. x 2ft. 10in. x 2in.	16/9
7ft. x 3ft. x 2in.	17/9

No. 4.

Raised bevel moulding as section N, page 11 (preface code with letter N) can be fitted to any pattern door about 10d. to 1/- per panel extra to square-framed section A. Some doors with raised bevel moulding are quoted for specially on pages 20, 21, and other pages.

We recommend section C for a good, solid mould in preference to our section B, although our section F is preferred by some customers.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 11.

Design 5.—We shall stock this design if there is a large demand. If a sufficient quantity was ordered the price would be 3d. to 6d. above No. 4 design. Prices vary according to quantity ordered. Code after first letter J to E.

Section B (solid O.G. Mould), page 11, stocked in sizes up to 6ft. 8in. x 2ft. 8in. x 1 1/4 in. at 2d. door extra to column above for square-framed doors, section A. Preface code with B.

Planted mould as sections E and F can be replaced by any section mould shown in our list at very little extra cost. See our moulding section for other panel mouldings.

No. 5.

No. 6.

No. 6 is an attractive pattern. All door designs selected from this page will be executed as section C, unless otherwise stated. We are making a speciality of this section, *i.e.*, ovolo solid mould.

Prices on application (stating quantity required) for designs on this page, to other sections shown on Pages 11 to 13.

Above prices are for Design No. 13, which is always sent if no particular design stated.

Design No. 14 if in stock about same price as No. 13. (Alter code first letter J to R.)

Design No. 15—we shall stock these in nearly every size if demand is sufficient. 9d. extra to prices above. (Alter code first letter J to S.)

Section B is in stock in some sizes up to 1 1/2 in. in thickness at 1d. per door less than section C, but section C will have better appearance.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 11.

SPECIAL SET OF NEW PATTERN DOORS.

Nine-panel doors at low prices—moulded as section C. We shall only stock a few of the sizes quoted below according to sizes required from time to time. Prices on this page are for dowelled doors only, see page 12.

Doors to design No. 22, section N, page 11, about 1/- extra to prices for No. 21. Code alter first letter J to R.

Six panel doors to Design No. 13 (see page 18), but bolelection raised mould as section N, page 11, same price as No. 21. Code alter first letter J to S.

If no special kind of six-panel door is mentioned we always consider it is three panels under and three over (as Design No. 13), and reserve the right to send this pattern. Kindly, therefore, always state the exact design to save any error, but give us the option to send either of two patterns when possible to save delay.

Any bolelection moulded doors as section N can be moulded on the back with mould as section E for about 2d. to 3d. per panel extra.

Any square-framed doors (section A) of any design, also sash doors and nearly every sort of door shown in our list, could be moulded with a raised mould as section N at extra cost over square-framed door of about 10d. to 1/- per panel. Section M also for about same cost.

Any doors can be moulded as section N only on both sides of door at double the price (or thereabouts) for moulding one side. State quantity required when asking for any special price.

FRONT DOORS.

Design No. 23.—1-in. raised panel, bolection moulded outside as section O, square framed inside. These can be made with thinner panels at a reduced price.

Design No. 24 as specification No. 23, but with fitted beads for glass on top.

Design No. 26.—Three top panels flat, and bolection as section N, bottom panel bolection and planted as section P.

No. 25.

No. 26.

BEAD & FLUSH and BEAD & BUTT DOORS

(To face weather.)

No. 27

Nos. 27 and 28 as section U, page 11, bead and butt, flush on front to face the weather. The panels are thick. Square at back.

Please remember bead and butt panels have upright beads only.

Any of the doors on this page can be moulded on back like section E for 2½d. to 3d. per panel.

2 1/2-in. or 3-in. mullion bar is generally placed between the two panes of glass on No. 35, but if 2-in. or 4-in. is preferred we sometimes have them in stock (code for 4-in. mullion is the same as above except that first letter is changed to R, or 2-in. changed to S instead of K).

No. 36 is prepared for one pane of glass. We stock the same sizes as in No. 35 at same prices. Code for No. 36 the same as above, except that first letter is changed from K to T. Diminished styles as No. 42, page 26, 1/1 per door extra.

Ovolo stops as section G, page 11, can be fitted (instead of beads as section V) at 1d. per door extra. (Preface Code with L.)

Before writing out an Enquiry or Order, kindly read through Pages 1 to 11.

SASH MOULDED DOORS (as Section S, page 11).

No. 37

On sash moulded doors (section S page 11) as shown on this page no sash beads are allowed for inside. If a loose ovolo bead is fitted (section T page 11) the extra is about 6d. per pane of square glass, extra again for curves. All prices are for parallel stiles, which are used if not ordered otherwise.

Gunstock (diminished) stiles, as No. 42, page 26, 1/1 per door extra. Preface code with W. Prices extra for glass for these doors approximately as for No. 36, page 24.

No. 38

ON SASH MOULDED DOORS GENERALLY.

The bead and butt panel will be flush on the sash mould side, not on the rebate side, unless specially arranged. Loose Ovolo Bead can be fitted inside, see Section T page 11 for 3d or 4d per pane of glass extra.

Above prices are for No. 37 door. No. 38 6d. extra. Code alter first letter K to R.

No. 39

Extra for segment head, as Design No. 39, 1/- over No. 37. No extra charge for two panels at bottom instead of one.

Any of these doors can have raised belection moulding as section N or M for about 10d. to 1/- per panel extra.

No. 40 shows a special arrangement of panels at the bottom. Where these are required the prices will be as follows —

If 3/4-in. raised panels (as shown), 6/- extra to No. 37. If flat panels, 2/- extra to No. 37. Special price for quantity. The arrangement of panels can be adopted in any other door.

No. 40

Before writing out an Enquiry or Order, kindly read through Pages 1 to 11.

Any Article can be Knotted and Painted either 1 coat or more.
Price on Application.

No. 41

No. 42

No. 43

No. 44

All glass doors are quoted with parallel styles, but if gunstock (diminished) styles, as No. 42, are required, 1/1 per door extra.

DOORS.

No. 61

Special Note.—The sashed portion of all the doors on this page is moulded on the outside of the door. The match-board filling of Nos. 61, 63 and 64 is flush on the outside—V-jointed boards being used in each case.

The panels of No. 62 are raised on the outside, and are drop-moulded front and back. Section F, or solid as C. If lock-rail mouldings are required, refer to page 37 for patterns and extra cost. Prices of Nos. 63 and 64 include for a lock-rail, as shown in the designs below.

No. 63

Doors can be glazed before despatch as quoted, or glass cut to size and sent loose, packed free, but cases are charged as extras, the full amount being allowed if they are returned to us carriage paid within one month of leaving our works.

If your architect prefers his own designs, send them along, and we will quote you prices.

No. 64 is a new design, and is most effective when glazed with bevelled plate glass (Code alter first letter K to B). The cost of glass is from 10/- to 13/-, according to the size of the door.

We can quote special prices for large numbers of doors in either pattern of one size.

No. 64

Before writing out an Enquiry or Order, kindly read through Pages 1 to 11.

DOORS.

No. 65

Nos. 66 and 67 are elaborate doors and can be supplied at following prices—
for Deal in each case—

No. 66.	Code.	No. 67.	Code.
1 10 0	KHF	1 11 6	KHJ
1 11 0	KHG	1 12 6	KHK

	7	0	3	0	21/-	KJF	25/6	KJJ	25/6	KJM

No. 73 will be 1/- per pair extra to No. 72 prices above. Code alter first letter K to R. If you order them with two panels in bottom of each pair, instead of four, the price may cost a little less if in stock at the time.

Above prices are for parallel styles. If you require diminished gunstock styles (see 42, page 10) price would be approximately 2/3 per pair extra.

The tops of doors are rebated to take glass and ovolo moulded as section S, page 11.

We reserve the right to send these doors with one or two lower panels moulded two sides as section C, or as section F.

No. 72 shows what the bead and butt panels are like in elevation. Beads are worked on upright edge of panels only, not across the panel.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 11.

These ornaments greatly add to the appearance of vestibule and other doors. In ordering state clearly the widths of doors for which they are intended.

We reserve the right to vary the patterns of the top mouldings to suit our convenience, and also we do not agree to supply single articles at above prices.

Above Tel. Code is for moulds 2-ft. long. If 2-ft. 2-in., alter K to A; 2-ft. 4-in., K to B; 2-ft. 6-in., K to C; 2-ft. 8-in., K to D; 2-ft. 10-in., K to E.

All prices are for ornaments not over 2-ft. 6-in. total length. Less than twelve of a sort, 10% extra, six of a sort 20% extra. State sizes required.

Prices for larger sizes on application.

Ornaments shewn on doors in the catalogue which do not appear on this page can be supplied separately, and we shall be pleased to quote prices on receipt of enquiry.

Quotations for special designs, in any wood, on application. Special prices for large quantities.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 11.

No. 104

SPECIAL DOORS.

Nos. 104 and 105 are two of our smart shop door designs, and will be found very effective. The lock-rails can be arranged at any height to suit customers. Pages dealing specially with shop front work will be found in another part of this catalogue. Prices for customers' own designs on application. The shaped bars shewn in design No. 104 are made to go across the face of the glass, so that one plate only will be required.

No. 105

PRICES.

	Deal.	Pitchpine or Canary Whitewood.	Mahogany or American Oak.	Austrian Oak or Teak.	Polishing.

" 107	1 19 6	2 9 0	3 5 0	3 12 0	0 16 0

Prices are for doors not exceeding 7-ft. x 3-ft. x 2-in.

British-polished plate glass can be supplied for Nos. 104 or 105 at £1 12s. extra. For extra cost of bevelling, see page 40.

The doors shewn on this page are of superior make and finish, and the carving is done by skilled workmen.

No. 106

Nos. 106 and 107 can be used with advantage where a striking effect is desired, the former being chiefly suitable for use as an entrance door. Both should be glazed with bevelled plate glass, as shewn. The costs of this glass fitted into door (with $\frac{1}{4}$ -in. bevel on one face only) are as follows:—

For No. 106 from 8/- to 10/6; No. 107 from 25/- to 30/-—according to size of door.

If glass not glazed but sent loose, cases are charged as extras, the full amount being allowed on their being returned to us carriage paid within one month of despatch from our works (special arrangements for export packing).

No. 107

PAIRS OF FRENCH DOORS OR CASEMENTS

No. 112

No. 112.—This design has a novel arrangement of bars, which should appeal to customers in search of something out of the ordinary.

Price per pair for doors not exceeding 7ft. x 4ft. (total width) x 2-in., 35/-.

21-oz. sheet glass cut to sizes or glazed from 9/- to 12/- extra; tinted Japanese (see page 40) glass cut to sizes or glazed from 13/- to 17/- extra, according to sizes of doors.

No. 113

No. 113 is also a novel design. Price per pair (subject to maximum measurements specified above), 29/6.

21-oz. sheet glass cut to size or glazed from 6/6 to 9/- extra; tinted Japanese glass cut to size or glazed from 9/6 to 13/- extra, according to sizes of doors.

No. 114

No. 114.—Price per pair (subject to maximum measurement, as before), 30/6.

21-oz. sheet glass cut to size or glazed from 6/6 to 9/- extra; tinted Japanese glass cut to size or glazed from 9/6 to 13/- extra, according to sizes of doors.

All the doors specified above have flat panels, drop moulded both sides.

Extra for Bolection moulding on one side

one side	2/- per pair
„ Bead flush panels on one side	2/6
„ Raised	1/9

The height of the lock-rails can be varied to suit customers' taste.

Prices for Pitchpine or Canary Whitewood, 30% higher than for Deal; Mahogany or American Oak, double the price of deal; Austrian Oak or Teak, about 2½ times the price of deal.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 11.

GLASS.

Fig. Z illustrates the **Fancy Glass** so frequently referred to in the foregoing pages. Experience has shewn us that this is one of the most popular patterns in Figured rolled. We can supply it white or in any of the standard tints. We recommend **Amber** as being the most attractive of the latter. Sample on application.

Prices : White, from 6d. to 7d. per ft. ; Tinted (any standard colour), 8d. to 11d.

Z.

We supply **British-polished Plate Glass**, cut to size and packed, at following prices :—

Plates not exceeding 6-ft. super	1/8 per ft.	These prices are generally reliable, but would, of course, be subject to any fluctuation of the market which might occur.

20-ft. "	2 2	
30-ft. "	2 3	
60-ft. "	2 4	

The usual thickness for plate glass is approximately $\frac{1}{4}$ -in., and when special thicknesses are required, special quotations are necessary. Customers should carefully note that the extra charges are greatest where glass *thinner* than the standard is required.

Prices for **Bent Plates** on application.

Where **Bevelled Plates** are required, the extra charges are as follows :— $\frac{3}{4}$ -in. bevel, 4d. ; $\frac{7}{8}$ -in., 5d. ; 1-in., 6d. ; $1\frac{1}{4}$ -in., 9d.—per lineal foot of bevel on one face of glass only. Example : A plate 2-ft. \times 2-ft. would require 8-ft. lineal of bevel on one face. Special prices would be necessary for bevelling on both faces. We shall be pleased to quote for grinding or polishing edges.

Glass can be *silvered* at from 5d. per ft. super, the cost per foot rising in proportion with the area of the plate.

We can supply **Leaded Lights** at from 1/3 per ft. super. Prices, of course, vary according to the sizes and patterns of the lights required. Definite quotations will be sent on receipt of full particulars of your requirements. Send in your enquiries for any kind of glass, and we will post you a price per return.

For prices of Horticultural and other sheet glass, see page 262.

All cases are charged up, but the amount is allowed in full on their being returned to us carriage paid within one month from date of despatch.

Notes re Framed Ledges and Framed Ledges and Braced Doors continued from page 23—When ordering Braced doors, kindly mention which is the hanging side when looking at the outside of face of door. Is it plan R, S, T, or U.

These doors are generally made of red deal, although we can quote for doors with white matchboard when special cheap quality is required. The match-boarding referred to in above doors is called in some districts sheeting, lining, etc.

This is generally V-jointed, similar to sections W and X on page 11 (unless specially ordered beaded).

Kindly give us the option to send V-joint or beaded where possible.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 11.

1½-in. SASHES AND FRAMES OR BOXED WINDOWS.

(For details of Windows with Reversible Sashes—the outsides of which can be cleaned from inside—see pages 64 to 69.)

SPECIFICATION.

Sill as Fig. 1037 on page 44, 1-in. pulley stiles and head, 4-in. \times ¾-in. inside casings, 3-in. \times ¾-in. square edged outside casings, 2-in. \times 1½-in. sash stile and head, 1½-in. rebated meeting rails, 3½-in. bottom rail, 1½-in. \times 1-in. sash bars, 1-in. \times ¾-in. stop beads, 1-in. \times ¾-in. parting beads, back lining and parting slips, patent unbreakable steel ball-bearing pulleys (as illustrated on page 51 of this Catalogue).

Where **FLAT-BOTTOMED SILLS** are necessary it must be mentioned when ordering, as otherwise we shall assume that our section (specified above) is suitable. Do not order them flat, unless it is absolutely necessary, as in nearly all cases our section will suit.

TO IRISH CUSTOMERS.—In many parts of Ireland 3-in. \times 3-in. sills are used—Figs. 1038 and 1039, page 44 shew two sections. Please state clearly if you require either of these.

All our Sashes and Frames are **Hand-Finished**, unless otherwise ordered.

The **POCKETS** in the pulley styles are **Properly Sawn**, not left to be split off by the fixers.

MINIMUM MEASURE for each pair of Sashes, with Frame, is 20-ft., and in calculating the measurement extreme sizes are taken each way.

SIZES are usually given by one of the following methods:—

- A. **OVERALL SIZES**, i.e., the extreme height and width.
- B. **DAYLIGHT SIZES**, i.e., heights from under sill to under frame head. Widths between pulley style.
- C. **SCOTIA SIZES**. This method will be understood in the districts where it is adopted.

Fig. 1001 on page 42 illustrates method B. Method C—as section 1003, page 42—is similar, except that the margin of casing outside would be increased to make room for Scotia.

Please specify very clearly by which method your Sizes are taken.

FLUSH SILLS are used in all cases, unless special arrangements are made to the contrary. (See alternative section of Projecting Sill—Fig. 1040, page 44.)

MACHINE-FINISHED WINDOWS for cheapest cottage work can be supplied at ½d. per ft. super less than prices quoted on page 43 if specially ordered as "Cheap quality machine-finished windows."

For **PRICES** see page 43.

We usually have in stock a number of windows in various sizes, which we can supply at bargain prices.

A circular giving specifications is periodically issued. These Goods may be stock soiled, but are never secondhand.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

SASHES AND FRAMES.

PRICES FOR OUR SPECIFICATION ON PAGE 41. With Additional Costs of Extras.

Without Bars, as No. 1000, page 42	6½d. per super. ft.		
2-in. Sashes, instead of 1½-in.	8½d.		
1-in. Casings, per side	1d.		
Pitchpine sills	2d.		extra
Oak or Greenheart sills	1d.		
1½-in. Pulley-styles	1d.		
1½-in. Pulley styles, tongued to casings both sides	1d.		
Axle pulleys with brass face and wheel	1d.		
Brass-faced pulleys	1d.		extra
Inside casings and sills, grooved for linings and window boards	1d.		
Bars in Sashes, as Fig. 1019	1d.		
" " " 1020	1d.		
" " " 1021, 1022	1d.		
" " " 1023, 1024	1d.		
" " " 1025, 1026, 1030	1d.		
" " " 1027	1½d.		
" " " 1028	1d.		
" " " 1029	2d.		
Selected quality, material, and finish	1d.		
Outside casings, moulded or beaded	1d.		

Priming Windows, 10d. each, for fair average sizes.

Sash weights, cords, and bronzed fastener supplied and fitted to windows not exceeding 24-ft. super. at 3/- per set for single hung windows, or 4/9 for double hung. Additional cost for brass fasteners, 6d. each.

MULLIONED WINDOWS, as Fig. 1004, page 42, are reckoned as equal to two ordinary windows, so that the minimum measure for one would be 40-ft.

TRANSOME WINDOWS, as Fig. 1002, page 42, 7½d. per super. ft.; minimum measure, 25-ft.

Prices for GLASS on application, or see pages indexed Glass.

SPECIFICATION and GENERAL REMARKS will be found on page 41.

For Prices and Designs of **VENETIAN WINDOWS**, see page 45.

SEGMENT AND SEMI-CIRCULAR HEADED WINDOWS.

These are made in two ways. In one case the segment or semi-circle shows on the outside only, the top of the frame and sash head being square inside. In the other case, the top of the window is segmental or semi-circular throughout. These are illustrated on page 42—see Figs. 1005—1008.

PRICES.

Segment headed as No. 1005, page 42, without bars	1d. per ft. super extra to ordinary windows
Segment headed as No. 1006, page 42	2½d.
Semi-circular as No. 1007, page 42, without bars	2d.
" " as No. 1008, page 42	4d.
" " with bars, as No. 1033, page 44	7d.
" " as No. 1034, page 44	9d.
" " as No. 1035, page 44	9d.

Gothic-headed Windows (see Fig. 1036, page 44) are supplied at the same prices as semi-circular, No. 1008, page 42.

The extra cost for Sash Bars in Segment headed Windows is the same as in Square-headed for designs Nos. 1019 and 1021; 3d. extra for Nos. 1020, 1023 and 1024; 4d. each for Nos. 1026 and 1030; 1/6 each extra for Nos. 1022, 1025, 1027, 1028, and 1029. These extra charges are, of course, additional to the prices quoted for Bars in Square-headed Windows.

NOTE.—All windows having shaped heads are measured as square to extreme sizes. We shall be pleased to quote prices for any kinds of windows not shown in this Catalogue.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

SASH PULLEYS.

WE CLAIM

Our Ball-Bearing Sash Pulley to be the best on the market, and to cost a very little per frame above ordinary axle pulleys.

YOU VERIFY our claim by trying a few dozen on some job and giving them a test under weight.

They are built for long steady service.

**ARE NOT FRAMES WITH BALL-BEARING PULLEYS
PREFERABLE ?**

Noiseless—Frictionless—Indestructible—Easily Set.

ADVANTAGES :—

Easy Running. No Screws required.

Being Steel they are practically unbreakable.

Pulley Stiles do not require to be housed : you simply slot pulley stiles to fit the pulley and drive them in fairly tight then with the punch, punch up into the wood the pieces of the pulley frame specially prepared for that purpose.

SMALL SAMPLE ORDER SENT ON APPLICATION.

THE OTTUMWA STEEL BALL-BEARING SASH PULLEY,

made by patented processes and available for use at only a trifling cost per frame above ordinary pulleys.

Frames with Ball-Bearing Pulleys will command the attention of any house owner if he is only given his choice, while our Pulley can be quickly set and will out-wear any pulley on the market without noise or friction.

Side views of wheel carried on eight 5/16 inch balls
Patented March 4, '02; April 29, '02;
September 16, '02; February 10, '03.
OTHER PATENTS PENDING.

Use Hard Sash Cord, and the Pulleys will give every satisfaction. Try them on one job NOW.

All Steel (blackened), 15/9 gross, or 1/9 doz.; with Screw Holes, Brass Face, 2/6 doz.

Blackened pulleys with screw holes, 1d. doz. extra.

Merchants supplied with large quantities at special prices.

To. 1130.—Wood Punches for driving pulleys, 6d. each, carriage paid taking 3 or more.

No. 1130

CASEMENT WINDOWS.

There are so many types of this class of window that it is impossible to illustrate them all. On page 53 we shew several designs.

The Specification for these would be as follows:—4-in. × 3-in. framing, 1½-in. casements.

All windows are subject to a minimum measure of 10-ft. per light. Thus, a frame containing one mullion and one transome (as No. 1138, page 53) would be reckoned as four lights, and charged as not less than 40-ft.

(PRICES as follows:—

As Section 1276 on Page 61 8½d. per ft. super

"	1277	"	"	9d.	"	"
"	1278	"	"	9d.	"	"
"	1279	"	"	10½d.	"	"
"	1280	"	"	10½d.	"	"
"	1284	"	"	9½d.	"	"
"	1285	"	"	9d.	"	"

Windows with 4-in. × 2-in. frame and planted stops, as Section 1267, Page 60, 7½d. per ft. super.

All the Prices quoted above are for windows without sash bars. On Page 54 we shew a number of sash bar designs, the extra costs being as follows:—

As Nos. 1163, 1170, 1171 .. 2d. per sash, or ½d. per ft. super of frame area extra

..	..	1153, 1172, 1173, 1180	4d.	"	"	½d.	"	"
..	..	1174	6d.	"	"	¾d.	"	"
..	..	1154, 1155, 1160, 1164						
..	..	1178, 1179	1/-	"	"	1½d.	"	"
..	..	1175, 1176	1/2	"	"	1½d.	"	"

..	..	1177	1/8	"	"	2d.	"	"
..	..	1161, 1167, 1181	3/-	"	"	3½d.	"	"
..	..	1159	3/6	"	"	4½d.	"	"
..	..	1168 or 1160	7/-	"	"	8½d.	"	"

Subject to 10ft. minimum as above.

SQUARE CASEMENT BAYS.—To same Specification as above, without Cornice, 1½d. per ft. super. extra.

SPLAYED BAYS.—To same Specification as above, without Cornice, 2d. per ft. super extra. Use diagram on Page 50 in giving sizes.

ANGLE MULLIONS of splayed bays would be in two pieces, as shewn in plan of design 1296, Page 62.

SOLID ANGLE MULLIONS would be charged extra in proportion with sizes.

CORNICE.—As on Boxed Bay, No. 1066, page 46, can be fitted to either of these at 6/- extra, if Windows are for openings not exceeding 6-ft. in width. Larger sizes extra.

Additional costs of better cornices will be found on page 46.

Quantities of at least £2 worth of Solid Windows must be ordered at Prices quoted above; smaller lots will be charged at 10% extra to all Prices. Extra for **HANGING SASHES** with steel butts, 1/- each, which includes one pair Hinges, Screws and labour.

4½-ins. × 3-ins. Framing 1d. per ft. super. of frame area extra.

OAK SILLS 1½d. " " "

PITCHPINE SILLS ¾d. " " "

We shall be pleased to quote Carriage Paid Prices to any station or port, or for any Special Designs.

Quotations for Sheet or Plate Glass and Leaded Lights on application.

FLUSH SILLS are used in all cases unless special arrangements are made to the contrary (see section No. 1283 of Projecting Sill on page 61.)

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

TYPICAL CASEMENT WINDOWS.

Nos. 1135 and 1136 are suggestions for Square Bays. They can be used for straight windows or splayed bays.

The cost of barwork in fanlights of No. 1136 would be 5d. per sash extra. See Pages 52 and 54 for Prices and Designs of sash-bar-work.

No. 1135.

No. 1136.

No. 1137.

CASEMENT BAY WINDOW.

SPECIAL DESIGN.

Prices for Glass in any Tint or Pattern, or for Leaded Lights on application.

Send us your enquiry for Windows of any description in large or small quantities.

In ordering Casement Bays, kindly make use of diagrams on page 50.

No. 1296.

No. 1296.—**Specification :** 4-in. \times 3-in. rebated framing, ovolo moulded inside, stop-chamfered outside, as Section No. 1277, Page 61. $1\frac{3}{4}$ -in. casements, moulded cornice with dentils; **angle mullions** in two pieces—screwed together.

Price : For sizes not exceeding 8-ft. high \times 8-ft. wide (both sizes overall) £6 12s. 6d. each.

Extra if angle mullions are solid, 15/- per window. The sill of this window is shewn projecting—if you prefer it flush, 3/- less. Specify when ordering.

For alternative sash designs see Page 54. Fanlights of the pattern shewn above can be supplied at 8/6 each extra to the prices quoted on Page 52 for windows without bars. If the bars are omitted there would be a corresponding reduction in the price of this window.

We are endeavouring in this Catalogue to cover as many subjects as practicable, but it is obviously impossible to shew everything. If, therefore, we do not illustrate exactly the thing you require, send us your particulars, and we will forward you a quotation.

NOTE.—All sizes of material specified are nominal, *i.e.*, sawn sizes, the stuff finishing about $\frac{1}{4}$ -in. less after being machined.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

FRENCH CASEMENTS AND FRAMES.

No. 1307.

No. 1307.—Specification : 4-in. X 3-in. rebated and ovolo moulded jambs and head, 3-in. X 3-in. transome, 1½-in. casements and fanlight, panels drop moulded both sides. Styles of casements 3-in. wide.

Price : For sizes not exceeding 8-ft. 6-in. high X 4-ft. 6-in. wide, £1 12s. 6d.

No. 1308.—Specification :
Same as for No. 1307.

Price : For sizes not exceeding 8-ft. 6-in. X 4-ft. 6-in. wide, £1 15s. per set.

No. 1308.

All prices are for red deal, and for woodwork only.

When ordering state whether casements are to open inwards or outwards.

We shall assume (unless instructed to the contrary) that sash moulds are in all cases to be kept inside, so that glazing will be done from the outside.

The panels of either design can be bead and flush, or bolelection moulded for 2/6 per set extra. Panels raised and bolelection moulded, as Section O (on page devoted to door sections, see index), 5/- extra.

If ordering special panels, be sure to state which side of the casements they are to be so treated, as circumstances and tastes vary.

If 1½-in. Casements are used instead of 1¾-in. 2/6 per set less.

2-in. " " " " 2/6 " extra.

No. 1309.

We shall be pleased to quote for customers' own designs, on receipt of full particulars.

No. 1309.—Specification :
Same as for No. 1307.

Price : For sizes not exceeding 8-ft. 6-in. high X 4-ft. 6-in. wide, £1 18s. 0d. per set.

No. 1310.—Specification and maximum sizes as before.

Price : £2 10s.

No. 1310.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

C. JENNINGS & Co's P.T.O. WINDOW FITTINGS.

No. 1320.

The P.T.O. Window possesses (amongst others) two great advantages:—Owing to the pivots being fitted near the bottom of the sash-styles, the sash when pulled into a horizontal position is almost wholly within the room. It must be obvious that in such a position it can be more easily cleaned than centrally pivotted sashes. In addition to this, the fact of the pivots being lower, means that the sash itself is much lower when open, which is certainly an advantage.

Fig. 1321 shews the bottom sash open for cleaning. The second advantage referred to is that our method permits the top sash to be opened below the bottom sash. That is the object of the space marked "S."

Fig. 1322 shews the top sash opened for cleaning. The fact of this being possible marks a distinct advance in this type of window.

No. 1321.

PATENT.

These fittings are designed to enable a person standing in a room to easily clean the outside of a window, without any risk to life. The cleaning of the outside of any ordinary upper-story window is certainly a dangerous proceeding, especially for a woman. Our P.T.O. fittings remove all danger. The sections shewn on the opposite page will be sufficient to shew that the cost is comparatively small. The windows are, nevertheless, quite satisfactory.

Fig. 1320 shews the window with sashes closed.

No. 1322.

Points to remember:—Sashes must have double styles, the bevelled joint being reversed below the pivots. A single sash weight (with a fitted pulley at top) must be used at each side of the window. This becomes necessary through the extra length of cord required. An ordinary fastener is all that is necessary to secure the sashes when closed. As will be seen from the prices on the opposite page, the cost of the fittings is small. We can supply sashes and frames fitted up. The extra cost varies from 6/- to 10/- per window for iron fittings (above the prices quoted on page 43) according to size and quantity.

These prices do not include for sash weights and cords. We can fit them, however, at prices slightly in excess of those quoted on page 43. Definite quotations on receipt of particulars of your requirements.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

A House ought to fetch £16 more for the extra cost of B.

P. T. O. WINDOWS —continued.

No. 1330.

Fig. 1331 shews a section of the sash styles. The bevelled joint shewn at "J" must be reversed below the pivots. The metal fillet (letter M) is intended to keep the cord style in its place, when the sash is opened for cleaning. The outside casing is prepared for a similar fillet.

No. 1331

Fig. 1333 illustrates the sash style, with cord attached (C.A.). From this the sash cord passes through the diverting pulley (D.P.) and thence to the sash pulley.

No. 1332

PRICES OF FITTINGS.

In Brass	7/6 per set
„ Iron	3/- „
Each set consisting of 4 Cord Attachers, 4 Diverting Pulleys, 2 pairs of Pivots.	

No. 1333

Special Terms for large quantities.

We shall be pleased to give any further information which may be considered necessary. Specimen windows may be seen at our works, or will be forwarded for inspection, carriage being paid both ways by applicants.

For details of other window fittings, see pages 66-69.

Our P. T. O. Windows for easy cleaning and for safety are designed on the best principle at a low cost.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

No. 1340.

SPECIAL SASH FITTINGS (Miller's Patent), etc.

The fittings illustrated on this and the following three pages render the cleaning of the outsides of sashes an easy matter. Fig. 1340 shews a window with the sashes closed. By adopting Miller's B.C. Patent Pivots and B.C. Regulator (patent applied for) sashes may be tilted at three different angles, which gives much more efficient ventilation than can be obtained with ordinary, non-revolving, sliding sashes. See section 1344 on opposite page.

Fig. 1341 shews both sashes reversed for cleaning. It should be borne in mind that when in this position, the top sash can be lowered until it rests on the bottom one, thus dispensing with the necessity of standing on chairs or steps when cleaning the outsides. As will be seen from the sections on the opposite page, no special details are needed for the frames, all the extra work being in the sashes.

These windows have been used in various parts of the country, and have invariably given satisfaction. From the prices quoted, it will be evident that the extra cost is small considering the advantages gained.

No. 1341.

No. 1342.

Fig. 1342 shews the sashes tilted for ventilation. The fittings required for one window are as follows:—

2 pairs of B.C. Pivots, with wrought pins at	..	2/6 for brass or 10d. for iron	
2 B.C. Regulators at	..	1/10	10d. "
The total cost being	..	8/8	3/4 "

Windows can be fitted up complete (with iron fittings) for from 6/- to 10/- extra to prices quoted on page 43, according to sizes and number required.

We are agents for Miller's fittings, and supply them at lowest trade prices. Specimen windows can be inspected at our works, or at our depots in Leicester and Porthcawl. For information concerning the application of these fittings to casement windows, see pages 68 and 69.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

MILLERS' FITTINGS (continued.)

No. 1343.

We would urge intending purchasers to call at our works or at one of our branches mentioned on the opposite page. The advantages of these windows will then be instantly apparent. Sample windows can be sent on application, applicant paying carriage both ways. Where very large quantities are required, we shall be pleased to furnish special quotation.

Fig. 1344 gives details of pivot and regulator. The latter is a spring bolt, and in addition to securing the maximum of ventilation, acts as a fastener when the sash is closed. It has been observed that sashes swinging on Miller's pivots are used for purposes of ventilation much more than ordinary sashes in adjacent houses. This we must attribute to the fact that they are so easily operated.

No. 1344.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8,

MILLER'S FITTINGS (Continued).

No. 1345.

As will be seen from the illustration on this and the opposite page, it can with advantage be applied to casement windows. The two illustrations—Nos. 1345 and 1346—shew a casement window with the top sash horizontally and the bottom one vertically pivotted. Both these methods ensure the maximum amount of ventilation, and at the same time render the cleaning of the outsides of sashes quite an easy matter.

The sections shewn on the opposite page will give an idea of the necessary details. The windows have been proved to be perfectly weather-tight—a great consideration as regards casement windows.

For the fanlights the B.C. pivots are necessary also the B.C. regulator (as illustrated on page 67). A new fastener has been designed for this sash (see section 1347, on opposite page), P.P.35 in brass. This will be found to be very secure.

For the bottom sash the following fittings are necessary:—1 Pivot, No. 60, for transome, 1 combined pivot and regulator (left-hand P.P.35, or right-hand No. 40), as shewn in Figs. 1349 and 1350, on opposite page; 1 fastener, P.P.54, and 1 corner staple for sill (see Figs. 1348 and 1351).

The principle of the regulator, P.P.35, is similar to the B.C., but in this case the sash be left at a greater number of angles than with the latter. Fastener P.P.54 is very similar to the one used for the fanlight. The costs work out as follows:—

Top Sash—

1 pair of B.C. Pivots, with wrought iron at	2/6 for brass or 10d. for cast iron
1 B.C. Regulator at ..	1/10 " " 10d. "
1 Fastener at	1/1 " " 1/1 for brass.
	<hr/>
	5/5 2/9

Bottom Sash—

1 Pivot, No. 60, for transome	1 2½ for brass or 5½d. for cast iron
1 No. 35 (left-hand) or No. 40 (right-hand) combined Pivot and Regulator	1/8 for cast iron 1/8 " "
1 Corner Staple	7d. for brass or 3d. "
1 Fastener	1/1 " " 1/1 for brass.
	<hr/>
	4/7½ 3/5½

No. 1346.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

MILLER'S FITTINGS—continued.

No. 1347.

Fig. 1347 is a cross-section of the upper part of the casement window shewn opposite. Note the fastener P.P.35.

Section shewing Pivot and Regulator, No. 35.

No. 1349.

Figs. 1349 and 1350 illustrate the Combined Pivot and Regulator referred to on page 68. The one shewn is left-hand; for right-hand order No. 40. We can supply a separate regulator of greater diameter for large casements (No. 50). This is best used where there is a window-board, otherwise it would project into the room. The prices of No. 50 are 6/6 for brass or 2/- for cast iron. When this is used Sill Pivots are necessary (No. 65), costing 1/4½ for brass or 5½d. for cast iron.

Elevation of Pivot and Regulator, No. 35.

No. 1350.

Large sheets giving full details of these windows may be had on application.

Specimen windows can be seen at our Works, or at Leicester and Porthcawl branches.

Prices for Casement Windows, fitted complete, on application.

No. 1348.

Fig. 1348.—Vertical cross-section of casement window. The sill staple, of which we shew an elevation below (Fig. 1351) is designed to keep moisture out at the point where it is most likely to penetrate.

Elevation showing Sill Staple.

No. 1351.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

SPECIAL WINDOWS.

No. 1360.

These windows are suitable for wooden buildings, or for brick openings where no stone dressings are used, or where house fronts are plastered.

Prices for other designs on application. Where nothing is mentioned to the contrary, we shall assume that the back of the outer casing finishes in line with the face of the wall or plaster.

No. 1361.

The ornamentation shewn can be supplied at the following charges in excess of the prices quoted on page 43:—

No. 1360—16/- each.

" 1361—20/- "

No. 1362—17/- each.

" 1363—16/- "

When less than four windows of one window are ordered, we make a slight extra charge.

No. 1362.

Similar finishings to these can be supplied for exterior doorways. They (the doorway finishings) are known in some districts as frontispieces.

Prices on receipt of full particulars. If enquiring, kindly give the width required for the jamb casings, stating at the same time whether they are to be plain or not.

No. 1363.

All the windows on this page have projecting sills.

(See Designs on Pages 73 to 76.)

PRICES for Fronts not exceeding 10-ft. high from floor to ceiling \times 16-ft. wide between walls.

Nos. 1516 and 1517 consist of Window, Cornice, Fascia, Pilasters and Trusses only. Inside sizes: 7-ft. high \times 8-ft. wide.

No.	All Deal.	All Mahogany.	All Teak.	Mahogany door and frame and window and the rest in deal.	Teak door and frame and window and the rest in deal.
1500	£10 10 0	£25 0 0	£32 0 0	£18 10 0	£22 0 0
1503	26 10 0	47 0 0	54 0 0	37 0 0	40 10 0
1504	12 0 0	29 0 0	37 10 0	21 0 0	25 0 0
1508	8 10 0	21 0 0	26 0 0	14 15 0	17 10 0
1509	13 0 0	31 0 0	41 0 0	22 10 0	27 10 0
1515	9 10 0	22 10 0	28 0 0	15 15 0	19 0 0
1516	4 15 0	10 5 0	14 0 0	8 10 0	9 10 0
1517	3 18 0	9 10 0	12 10 0	7 0 0	8 0 0

Except for the iron bars in door and fanlight of No. 1515, all prices are for woodwork only, but we shall be pleased to quote for glass, polishing, blinds, door and fanlight fittings, etc., on receipt of enquiry. When we supply glass a charge is made for the cases, which is allowed on their being returned to us carriage paid. We can furnish estimates for fixing if necessary. If several fronts of the same design are required it is advantageous to arrange to have them fixed all at the same time, and we shall be pleased to quote specially low prices in such cases.

Shop windows are usually put together before being sent away, unless they are too large for an ordinary railway truck. When they are very large customers should say when ordering if they particularly wish them put together, as we can generally arrange to use specially large and low trucks for them when necessary. There would, of course, be an additional charge on the cost of carriage for this, unless sufficient goods were ordered at the same time to make up a truckload. When ordering kindly note the following hints as to taking sizes:—

- (1) Give the total height from floor to under bressummer.
- (2) The width between walls.
- (3) Height from floor to under subsill or stall board.
- (4) Splay and depth of doorway (unless it is left to our discretion).
- (5) Width of door (this is usually 3-ft.). The under side of bressummer is sometimes lower than the level of the shop ceiling. Special reference should be made to this when ordering.

Prices for Special Designs on applications.

See Pages 78 to 87 for Prices and Designs of Shop Fittings and Sundries.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

STAIRCASES.

No. 1620.

No. 1620.—Open String Staircase of special design.

Specification.— $1\frac{1}{4}$ -in. treads, 1-in. risers, $1\frac{1}{2}$ -in. strings, 5-in. reeded bottom newel (as No. 1682, page 94), 4-in. top newel (as No. 1680) running to floor, $3\frac{1}{2}$ -in. \times $2\frac{1}{4}$ -in. handrail, $1\frac{1}{4}$ -in. panelled spandril finishing at 2nd newel. Special pattern balustrading, as shewn, 2 shaped steps at bottom. If only one is required deduct 2/6.

PRICE.

In Deal	£7 5 0
„ Pitchpine	£10 7 6

Extra for handrail and balusters (not exceeding 11 lineal feet) for landing—Deal, £1 10s.; Pitchpine, £2 5s. Any of our better pattern newels and balusters may be used for this staircase.

See prices and designs on Pages 94 to 99.

Note remarks on page 89 re handrail finishing at joist, and also hints on page 91 as to the best method of giving sizes.

Prices are for stairs not exceeding 14 risers high and 2-ft. 8-in. wide, the going of treads not to exceed $8\frac{1}{4}$ -in. each. (i.e. from the face of one riser to the face of the next).

No. 1621.—Closed String Stairs.

Specification.—Same as for No. 1625, page 89.

PRICES as follows.

In Deal, with one newel only, the handrail finishing at the joist .. £2 4 0

If a short newel is required at the top, 4/- extra, the handrail finishing at joist as before.

Extra for handrail and balusters for landing (not exceeding 12 lineal feet), including the short newel and sufficient casing and nosing for finishing landing, 15/-

If it is intended for the first handrail to run from newel to newel, it should be mentioned.

The 1-in. matchboard spandril shown is not included for in our price, but can be supplied (finishing at the second newel) for 7/- extra. The material for this would be sent loose.

Where the top newel is required to run to the ground, there will be an extra charge of 4/-, or, if preferred, a lengthening piece can be sent for 2/3 extra.

Quotations for stairs in oak, mahogany, or teak on application. The extra cost of using pitchpine balusters or handrail with deal stairs may be found by referring to the pages dealing with those items.

No. 1621.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

STAIRCASES.

No. 1625.

No. 1625. — Specification : 1-in. treads and risers, $1\frac{1}{2}$ -in. strings, $1\frac{1}{2}$ -in. round turned balusters, 2 4-in. round turned newels, 3-in. \times 2-in. moulded handrail, 2-in. \times 1-in. capping for outside string, wall string torus moulded, 4-in. \times 1-in. nosing for top riser, 3 winders at bottom.

PRICE.

In Deal £2 15 0 per set

The winders can be at top instead of bottom if preferred, without extra charge.

Panelled spandril, as shewn in design No. 1620, page 88, £1 6s. extra.

Bullnose step at bottom (as shewn in design No. 1626), 2/6 extra; $1\frac{1}{4}$ -in. treads 2/6, and $1\frac{1}{2}$ -in. strings 2/- extra.

Handrail and balusters for landing (not exceeding 11 lineal feet), 10/- extra.

The newels for this staircase would be as No. 1680, page 94, and the balusters as No. 1698, page 95.

Prices include for beaded casing for covering joists.

In the majority of cases the handrail which follows the stair-string stops at the joist, the top newel running up to receive the landing handrail. This saves the use of an extra newel, or of a piece of shaped rail on the landing. Our prices are for 2 newels per flight of stairs and for straight handrail on the landing. When enquiring for shaped handrails, please refer to page 93.

No. 1626.—Open String Stairs.

Specification : $1\frac{1}{4}$ -in. treads, 1-in. risers, $1\frac{1}{2}$ -in. strings, 5-in. square bottom newel, pateras on top square, lower portion panelled, 4-in. top newel (as No. 1680, page 94), $1\frac{1}{4}$ -in. round turned balusters (as No. 1698, page 95), 3 \times 2 $\frac{1}{2}$ -in. moulded handrail.

The bottom newel may be reckoned as equal to No. 1718, page 96.

PRICE.

In Deal	£3 12 0
„ Pitchpine	6 0 0

Handrail and balusters for landing (not exceeding 11-ft., as above) : Deal, 14/- extra; Pitchpine, 20/- extra. Where better pattern newels, balusters or handrails are required, the difference in cost can be ascertained by referring to pages 94 to 99. Extra for panelled spandril (as in design No. 1620, page 88) : Deal, £1 6s.; Pitchpine, £1 18s.

Note remarks on page 91 re giving sizes.

These prices are for stair not exceeding 14 risers high \times 2-ft. 8 in. wide. The going of each tread (i.e., from the face of one riser to the face of the next) not to exceed 8 $\frac{1}{4}$ -in.

All spandrils finish at the second newel, unless otherwise arranged and quoted for.

No. 1626.

STAIRCASES.

No. 1630.

No. 1630 is a specially elaborate design suitable for a high-class residence. We shall be pleased to furnish quotations on receipt of sizes. When sending enquiry please specify clearly whether you want the spandril, wall panelling, seat, columns and grilles included, also say what wood is required.

On Page 92 will be found a number of stair plans, which may assist you in conveying your ideas to us. Also see hints on Page 91 as to giving sizes.

Refer to Pages 179 and 180 of our Moulding Section for patterns of Handrails and other Stair Materials.

No. 1631.

Geometrical

Stairs.

We shall be pleased to quote prices for any stairs of this type, in any wood, on receipt of application.

No. 1631.

No. 1631A.

Shaped, scrolled and wreathed handrails can be supplied, and are dealt with on Page 93.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

STAIRS.

We supply straight flights of stairs (without Newels, Balusters, Handrails, Cappings and other finishings) as design 1640 page 92, at 30/- per flight. This price is for stairs not exceeding 14 risers high \times 2ft. 8in. wide, the going of each step not to exceed 8 in.

from face of one riser to the face of the next.

Specification: 1in. Treads and $\frac{3}{4}$ in. Risers $1\frac{1}{4}$ in. strings.

Refer to pages 179 and 180 of our Moulding Section for patterns of Handrails and other Stair Material. *see index*

No. 1636.

Where the first handrail has to run from newel to newel, instead of finishing at joist, the stairway needs to be at least 4-in. wider than the stairs to allow for this. In such cases an extra newel, or else a piece of ramped handrail is generally necessary, for which we have to charge extra.

If none of the designs shown in this book, exactly suit your case, they may assist you in preparing rough sketches in order to convey your ideas to us. These sketches are always acceptable.

Customers are requested to make use of this diagram in giving sizes of stairs. Much correspondence and valuable time may be saved in this way. On Page 92 will be found a number of stair plans, which may be of service in giving particulars.

A indicates height from floor line to floor line. Sometimes a *return step* is used at E. In such cases give the height at C, and then the extra height to the *top landing*. This is very necessary, as it affects the height of the top newel.

B shews the *going* of stairs, *i.e.*, the width (measured horizontally) from the face of the bottom riser to the face of the top one.

C—width of stairs overall of strings.

D—depth of joist (to enable us to decide the width of casing required).

E—width of landing at return.

F—Total width of stair-space (this is not necessary for ordinary straight flights, without returns).

G—length for landing handrail. If a short piece is required to return to wall, give the length.

Some of the measurements indicated above are not needed for ordinary cottage stairs, but customers will see what is really essential. Rough sketches are always acceptable, and often clear away doubts as to what is required.

Be sure to state the *hand of stairs*, *i.e.*, whether the handrail is to be on the right or left side going up. Our diagram above shews what we call a right-hand stair.

We reserve the right to use red or white deal for the treads in all deal stairs, unless special arrangements are made to the contrary. Customers desiring to have balusters or newels etc., of better patterns than those quoted for on Pages 88 and 89 can easily ascertain the difference in cost by referring to Pages 94—99.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

STAIR PLANS.

These illustrations are intended to assist customers in preparing their enquiries, and we hope they will be the means of saving time and preventing errors.

1639 1640 1641 1642 1643 1644 1645 1646 1647

These can be used in conjunction with the diagram shewn on page 91.

The number in each case is at the bottom step of the stairs.

1648 1649 1650 1651 1652 1653 1654 1655 1656

Nos. 1662—1665 shew four methods of finishing the starting steps of stairs.

1658 1659 1660 1661 1662 1663 1664 1665

We shall be pleased to furnish prices for stairs of any description in any of the usual woods. Architects' details accurately worked to.

Before writing out an Enquiry or Order kindly read through Pages 1 to 8.

HANDRAIL WREATHS, RAMPS, SCROLLS, ETC.

Wreathed Handrail.

Shaped on plan and elevation.

No. 1670.

Swanneck.

Straight on plan, shaped in elevation.

No. 1672.

Bottom Ramp.

Straight on plan, shaped in elevation.

No. 1674.

Paper Patterns will be good enough for all these rails, except No. 1670 and No. 1673

Be sure to state whether the pattern sent is the plan or the elevation

Drop Scroll.

No. 1675.

Quadrant.

Circular on plan, straight in elevation.

No. 1671.

Bottom Scroll.

Shaped on plan and in elevation.

No. 1673.

Top Ramp.

Straight on plan, shaped in elevation.

No. 1676.

Semi-Circular or Quadrant-shaped Well Holes can be supplied. Quotations on receipt of full Particulars.

The shapes outlined above show some of the forms of handrail most in use. We shall be pleased to quote for these (or others) in any wood and worked to any section, on receipt of enquiry.

Customers are particularly requested to refer to these by the names and numbers we have used for them, as in this way much valuable time may be saved, and possibly errors avoided. It is also important to give clearly the *pitch* of the stairs, and where wreathed rails are required a plan drawn to scale should be sent, showing the exact positions of stair-risers, and in cases similar to No. 1670 a correct drawing of the stair well.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

For the convenience of customers desiring to telegraph orders, we have arranged code for all newels and balusters. For example:—When ordering newels as p. 1685 in 4-in. pitchpine, combine and telegraph the letters XFD as one word. We have also adopted the General A.B.C. Code (5th edition), which may be used in conjunction with the above.

For prices and designs of square cut and panelled newels, see pages 96 and 98.

Where not otherwise arranged, our round-turned newels have 19-in. of turning below the top square.

Special quotations for large quantities or special designs.

The balusters on page 95 will be found to include designs matching each of the newels shewn above.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

ROUND TURNED BALUSTERS.

These Balusters include designs to match all the Newels on page 94.

	6in.	9/-	11/3	12/-	16/6	18/-	23/-	24/-	Z

These prices are for newels not exceeding 5ft. long, and for not less than four ordered at one time. For smaller orders there will be an extra charge of from 1/- to 5/-, according to pattern. In ordering give the following sizes:

- (1) height of plinth;
- (2) height from top of plinth to neck moulding (if any is shewn);
- (3) height between neck-mould and underside of cap.

For Nos. 1721 and 1722 simply give height of plinth and total length. Special attention to these points will save much valuable time. Where deal newels

are ordered we reserve the right to use whatever suitable kind of material we may have in stock at the time, seeing that deal cannot be obtained thicker than 4in. When sending sizes, give a rough sketch shewing how newels have to be fixed, so that the proper squares may be panelled, etc. See Notes on page 94 re Code.

Special Prices for large quantities or other designs.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

SQUARE MOULDED NEWEL CAPS, ROUND TURNED PENDANTS AND PATERAS.

Square Moulded Caps.

All these goods are cleanly cut and well finished from good material. In ordering please give the exact size of the newels for which they are intended.

Pateras.

Caps of these patterns can be fitted to the newels shewn on page 96. Prices for the difference in cost on application.

Prices are for balusters 3-ft. long with 19-in. of moulded work. 2-ft. 9-in. 5% less; 2-ft. 6-in. 10% less—with the same amount of moulding.

FRETSAWN BALUSTERS.

We recommend the hardwood referred to in the second column of prices, as it comes out much cleaner from the saw than deal, and, for most purposes, does away with the necessity of cleaning up. The option as to the kind of hardwood we may use for this is entirely ours, but we shall be pleased to submit a sample on receipt of application.

Code.

The prices quoted above are for balusters 2-ft. 6-in. long x 4-in. x 1-in. (except No. 1759, which is 6-in. x 1-in.). The material is machine planed before being fretcut, but no cleaning up is done unless special arrangements are made for it. We show two examples of No. 1761. These are best fixed close together, as illustrated. Any of our balusters can be supplied in lengths suitable for porch or balcony balustrading.

Special prices for large quantities or other designs on application.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

TRELLIS SCREENS.

No. 1778.

No. 1778.—**Specification** : 3-in. \times 2-in. framework, with planted beads each side, ordinary expanding trellis filling ($3\frac{1}{2}$ -in. mesh), 5-in. \times 1-in. ornamental crestring. Size: 6-ft. 6 in. high (to top of crestring) \times 16-ft. wide; door 6-ft. \times 2-ft. 6-in. \times $1\frac{1}{2}$ -in.

PRICE £2 12 6

If mesh as No. 1773, page 100, 5/- extra.

If 2-in. mesh.. 10/- extra.

5 in. \times 1-in. crestring can be supplied at following prices. As on No. 1778, 4d. per ft.; as on No. 1779, 5d. per ft.

Fretcut brackets, as in No. 1779, 10-in. \times 10-in. \times 1-in., 2/- each;
7-in. \times 7-in. \times 1-in., 1/6 each.

For prices of Expanding Wood Trellis, etc., see page 102.

No. 1779.

No. 1779.—**Specification and Sizes** as above, the trellis being omitted from the upper part, and fretcut brackets added.

PRICE £2 8 0

If mesh as No. 1773, page 100, 2/6 extra.

If 2-in. mesh .. 5/- extra.

Quotations for trellis work of any description or sizes on application.
For other patterns of crestring see page 104.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

TRELLIS DOORS.

No. 1770.—Specification: $1\frac{1}{2}$ -in. door, filled with trellis ($3\frac{1}{2}$ -in. mesh) fixed with double beads.

PRICES.

6-ft. \times 2-ft. 6-in.	10/- each
6-ft. 6-in. \times 2-ft. 6-in. ..	11/- ..
6-ft. 8-in. \times 2-ft. 8-in. ..	12/- ..
2-in. mesh $2\frac{1}{6}$ each extra.	

Doors can be supplied with trellis simply nailed on the framing for $1\frac{1}{6}$ each less, but we do not recommend this method.

No. 1771.—Specification: As No. 1770, but with lower part match-boarded, flush on one side.

PRICES.

6-ft. \times 2-ft. 6-in.	11/- each
6-ft. 6-in. \times 2-ft. 6-in. ..	12/- ..
6-ft. 8-in. \times 2-ft. 8-in. ..	13/- ..
2-in. mesh $1\frac{1}{6}$ each extra.	

No. 1773.

Illustrates "Diamond Mesh" the opening measuring about 6" high \times 3" wide, the laths being about $2\frac{1}{2}$ " apart, measured square. This pattern can be used for door No. 1770 for 9d. extra, or for No. 1771 or 1772 for 6d. extra.

No. 1772.—Specification: As above, but with diagonal matchboard panels in lower part. (The panels are not flush on either face.)

PRICES.

6-ft. \times 2-ft. 6-in.	12/6 each
6-ft. 6-in. \times 2-ft. 6-in. ..	13/6 ..
6-ft. 8-in. \times 2-ft. 8-in. ..	14/6 ..
2 in mesh $1\frac{1}{6}$ each extra.	

Prices for other sizes on application.

No. 1770.

No. 1771.

No. 1772.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

23—	" X 13 " 0 "	" X 10 " 0 "	6/8 "

Expanding trellis can be supplied, made with half-round laths (as Section No. 1789) for 50% extra to prices quoted.

Trellis Framing.	Nominal Trellis Laths. Sizes.
1787. Top Rail .. 1d. per ft.	1788. Flat 1 X ½ in. 2/- per 100ft.
1790. Bottom Rail .. " "	1788. " 1½ X ½ in. 2/3 "
1792. Style .. " "	1789. Half-round " "
1793. Mullion .. " "	1 X ½ in. 3/3 "
	1789. " 1½ X ½ in. 4/- "

Any of these goods may be creosoted (under pressure of 120lbs. to the square inch) for 25% extra to prices quoted. This doubles the life of the material, as the preservative is forced right through it and thoroughly impregnates every part. It is important to note that creosoted woodwork cannot be painted, but the dark colour which this treatment gives it is usually considered satisfactory as a finish.

Trelliswork can be dyed almost any tint for 12½% extra to prices quoted
 " " " painted any colour for 10% extra per coat.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

BARGE-BOARDS.

Some customers may prefer a vertical drop end in such patterns as Nos. 1802 or 1805. In such cases, the pitch of the roof must be given.

Some of the designs shewn here are suitable for use as cresting. For other designs, see page 104.

DOOR FRAMES.

Front Door Frame.

No. 2000.—Not exceeding 9-ft. x 3-ft. 6-in.

Specification.—4-in. x 3-in. jambs and head, 3 x 3 transome, fanlight with fitted beads for glazing—as section. In ordering, give total height and size of door (not forgetting thickness) for which the frame is required. For Prices, see below.

No. 2001.—Not exceeding 9-ft. x 3-ft. 6-in.

Specification.—2 x 2 frame, with 1-in. casings—see section. Price 7/6 each.

Where doors thinner than 2-in. are to be used, the frame material will be correspondingly smaller one way.

Cased Door Frame.

No. 2000.

3-in. x 2-in. framing with planted stops similar to section No. 1268, on page 60..	6/2	4/-	10/6
4-in. x 2-in. framing with planted stops as section No. 1267, page 60	7/-	4/6	11/6
4 in. x 3-in. rebated and ovolo moulded framing, as section in No. 2000.. ..	8/-	5/6	13/6
4½-in. x 3-in. ditto.. ..	8/9	6/-	14/6
5-in. x 3-in.	9/3	6/6	15/6
6-in. x 3-in.	10/9	7/6	17/6

Sashes can be fitted in fanlights of Nos. 2000 and 2001 at from 3/- upwards. All prices are for six or more frames ordered at one time.

Special quotations for large quantities or special details.

If *Daylight Sizes* are intended it should be mentioned, and supplemented by a rough sketch showing exactly how sizes are taken.

NOTE.—Transomes in solid moulded door frames are always used about 1-in. narrower than the jambs—as shown in section of No. 2000, unless arrangements are made to the contrary.

Door Frame without Transome.

No. 2002.

In ordering door frames give sizes of door for which frame is intended, and in **No. 2003** the total width of frame and height from floor line to under sill. It is assumed that flush sills are required when nothing is mentioned to the contrary. The sash in the wing light would be 1½-in. thick.

No. 2003.—Prices quoted for this frame are for sizes not exceeding 7-ft. high x 5-ft. 6-in. wide.

See other Designs on page 106.

Door Frame with Wing Light.

No. 2003.

We shall be pleased to quote for any kinds of door frames not shown here, in large or small quantities.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8,

DOOR FRAMES.

No. 2010.—Segment headed door frame.

Prices.—Where rise of head does not exceed 6-in., 4/6 each extra to those quoted on page 105.

No. 2011.—Semicircular headed door frame.

Price.—9/- each extra to square headed.

We shall be pleased to quote for any kinds of door frames not shown here, in large or small quantities.

Designs of fanlight sashes suitable for Nos. 2010 and 2011 will be found on page 54.

In ordering segment-headed frames give door size, and state clearly, height to springing, and rise of head.

No. 2010.

In ordering semi-circular headed frames give door size and total height.

In ordering Gothic headed frames, if the radius of the head is not left to us show clearly what centres we are to work from.

These can also be supplied with framing of various other sizes, as described on page 105. Prices on application.

If *Daylight Sizes* are intended it should be mentioned, and supplemented by a rough sketch showing exactly how sizes were taken.

NOTE.—Transoms in solid moulded door frames are always used about 1-in. narrower than the jambs—as shown in section No. 2000, page 105, unless arrangements are made to the contrary.

No. 2011.

No. 2012.

Gothic headed door frame. Prices same as for semi-circular.

Please refer to general remarks on page 105.

No. 2013.

Door frame with wing lights and fanlight.

Price for frame not exceeding 9-ft. x 6-ft., with 4" x 3" solid framing and 1½" sashes, £1 11s., taking not less than three at one time.

Special Quotations for large quantities or special details.

No. 2012.

No. 2013.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

VESTIBULE SCREENS.

No. 2018

SECTION

No. 2018.—9-ft. × 5-ft.

Specification.—4-in. × 2-in. frame with moulded stops, 1½-in. door and side lights. The portion above the transome prepared for glass to be fixed with moulded stops. Bottom panels of door and side lights flush moulded both sides, upper portion with double beads fitted for glazing, as shown in section.

Price in deal, £2 7s. Extra for separate sashes above transome, 10/-; for 1½-in. door and side lights, 8/-; if door and side lights are sash moulded and rebated for glass, 2/-; if bottom panels are bolection moulded on face side, 4/-; extra for 4-in. × 3-in. solid moulded and rebated framing, as section No. 1254, page 59, 8/6.

No. 2019.—9-ft. × 6-ft.

Specification.—4-in. × 2-in. frame, as in No. 2108, 1½-in. door, side lights and fan lights, ovolo moulded on face side throughout. Bottom panels flush moulded at back.

Price, in deal, £3 18s. Extra for bolection moulded panels, 5/-; raised panels, as section O on page dealing with door sections (see index) 5/-; 4-in. × 3-in. solid moulded and rebated frame, as section No. 1254, page 59, 9/-.

No. 2019.

Quotations for large quantities or special designs on application.

Prices for glass of any description, or for screens in any of the hardwood will be sent per return of post.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

PULPITS.

No. 2222.

No. 2222.

Pulpit—back left open to fit against wall (see plan), width in clear 3-ft. 6-in.

Prices in—

Pitchpine	£22	10	0
American Oak	27	10	0
Austrian Oak	30	15	0

Austrian Oak. — This, in our opinion, gives the most satisfactory results. It is, of course, the most expensive of the imported oak, and includes not only that actually grown in Austria, but also that which comes from adjacent countries.

No. 2223.

Pulpit—same size and shape on plan as 2222.

Prices in—

Pitchpine	£15	15	0
American Oak	21	0	0
Austrian Oak	23	10	0

NOTE—The term "Austrian wainscot oak" does not necessarily refer to figured oak, so that if you require the latter it should be mentioned when sending enquiry.

No. 2223.

The material used for forming floor would be Deal, unless special arrangements were to the contrary.

The position of stairs can be reversed if mentioned when ordering. Adjustable book boards can be supplied for 15% extra to prices quoted above.

If the floor of pulpit is required at any special height, please specify when ordering.

Quotations for every description of Church furniture in any of the usual woods on application.

No. 2503.

Prices include skirting in each case, all work being measured overall.

No. 2504.

Plate Rail, suitable for using with No. 2503. Height overall 5 in., projection from wall 5 in., brackets 18 in. apart.

Prices :—In Deal, 8d.; Pitchpine, 8d.; American Oak, 1/-; Austrian Oak, 1 6 per ft.

All panelling is made with 1-in. framing, unless special arrangements are made. Special prices on application for very large quantities or special designs.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

COTTAGE PORCH.

Note the novel trellis work, and the openwork in the gable.
Side Elevation.

No. 2512.

No. 2512 shews a porch combining a good effect with comparatively small cost. Nothing adds more to the appearance of a cottage in the country or suburbs than a neat porch.

The Price of this as shewn, for sizes not exceeding 9-ft. high \times 6-ft. wide \times 3-ft. 6-in. back to front, in Deal, is £4 18s. This does not include for any roof covering, but we can prepare for tiling or felt if mentioned when ordering. A door can be added to the front for 12/6 extra.

The framework is of 3-in. \times 3-in. and 3-in. \times 2-in., the lower portion being filled with matchboards.

The roof can be prepared for glazing for 6/- extra. The sides and front can be prepared for glazing without extra cost.

This design can be used for a summer-house. Prices, including seats and floor on application.

No. 2514.

No. 2514.—Design for Fretcut Ventilating Panel or Fri. etc. Prices on application, giving sizes and quantity required.

No. 2513.—Porch (half-elevation shewn), not exceeding 10-ft. high \times 10-ft. wide and 4-ft. from back to front.

PRICE :—In Deal, including floor and joists, £7 15s. No roof material included.

This porch is comparatively simple in design, but gives a nice effect. It is also suitable for a verandah front.

For Prices and Designs of Porch Sundries, see Pages 140 to 143.

No. 2513.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

PORCHES FOR COUNTRY RESIDENCES.

No. 2520.

No. 2520.—Not exceeding 10-ft. high \times 6-ft. wide \times 4-ft. back to front.

Price in Deal, £4.

This Porch has one end only.

Prices for Porches of special design on application.

No. 2521.—Elaborate Porch, with balcony railing above.

Not exceeding 12-ft. high \times 11-ft. wide \times 4-ft. back to front.

Price in Deal, £15 15s. This does not include for floor and joists for top or bottom, but the framework would be sufficiently strong to receive these. No steps are included, as they are usually preferred in stone or cement.

Designs Nos. 2521 and 2522 shew half-elevations only.

No. 2521.

No. 2522.

No. 2522.—Not exceeding 12-ft. high \times 11-ft. wide \times 4-ft. back to front.

Price in Deal, £22. No joists or floor for top or bottom included, nor any steps, as the latter are usually of stone or cement. This porch would be prepared to stand on a brick base.

For designs and prices of Porch sundries, see Pages 140 to 143.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

PORCH SUNDRIES.

BALCONY RAILING.

2530

2531

2532

2533

Specification :—2-ft. 6-in. high, in Deal; 3-in. \times 2½-in. top rails, as No. 2534; 1½-in. \times 1½-in. plain square baluster work, framed together as shewn, No. 2532 having ornamental brackets.

Prices as follows :—

No. 2530.—2/- per lineal foot.

No. 2532.—2/6 per lineal foot.

" 2531.—2/6 " " "

" 2533.—3/6 " " "

All prices are for not less than 16 lineal feet of one pattern in one order.

TOP AND BOTTOM RAILS.

2534

2535

2536

No. 2534 can be grooved for balusters if required. In ordering state size of groove ¼d. per ft. extra is charged for this, unless a quantity of 100-ft. is ordered, in which case no extra charge would be made.

No. 2534.—3-in. \times 2½-in. Top Rail 3½d. per ft.

" 2535.—" Bottom Rail 3d. "

" 2536.—" " 3½d. "

If not in stock, there would be a setting up charge of 5/- on less than 100-ft.

Moulded Baluster, as No. 2537.

2537

Prices in Deal :—

1½-in. \times 1½-in. .. 10/- per 100-ft.

1½-in. \times 1½-in. . 8/- "

Please specify the lengths these are to cut, so that we may send them with as little waste as possible.

These are moulded on the two faces only, the sides being flat. This is done to facilitate painting after the balusters are fixed.

All prices are for Deal. Pitchpine can be supplied for 30% extra.

Quotations on application for special Porch or Verandah work of any description.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

No. 2634.

Prices for large quantities or special designs or sizes on application.

For prices and designs of posts suitable for use with these gates, see page 151

No. 2635.

No. 2635.—8-ft. wide, 4-ft. high at centre, rising 6-in. at sides, and finished with a moulded capping. The upper panels are left open, the lower ones being filled and ovolo moulded on both sides. This gate is made from 2-in. material.

Price—			
In Deal.. ..	£2 15 0	each	
„ Pitchpine ..	3 17 6	„	
„ Oak ..	5 10 0	„	

No. 2636.—Pair of framed ledged gates, 8-ft. wide, height to top of rail at centre 4-ft., rising 1-ft. at either side.

Price—		Per pair.
In Deal, 2-in. thick ..	£1 19 0	

No capping is fitted to these gates, unless specially arranged for.

No. 2636.

For Hinges and Fastenings, see pages 256 and 257.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

GATES.

No. 2644.

No. 2644.—Field Gate, 9-ft. wide
× 4-ft. high × 3-in. thick, with
3-in. × 1-in. rails and braces.

Price—

In Unplaned Deal..	10 6
Machine-planed do.—extra	2 6
In Unplaned Oak..	20 —
Machine-planed do.—extra	5 /—

Extra for Creosoting by force, 2 /—; or for using bolts and nuts where rails and braces cross each other, 1 /3.

For prices and designs of Fencing in iron and wood, see pages 202 and forward.

No. 2645.—Field or Entrance Gate, 9-ft. wide × 4 ft. high × 3-in. thick, framed and braced.

Price—

In Deal	20 /—	each
If ledged and braced (not framed) ..	14 /—	..
It as last, but unplaned	12 /—	..
Extra for Creosoting by force	2 8	..

No. 2645.

When ordering *braced* gates, be sure to state the hand required. See remarks on page 40.

Creosoting by force (120lb. pressure per inch) is recommended where gates are not required painted. This process doubles the life of the material. Customers should note, however, that creosoted wood-work cannot be painted.

No. 2646.

No. 2646.—Pair of framed, ledged and braced gates, 4-ft. high × 8-ft. wide × 2-in. thick. Height does not include rounded horns.

Price 29 /— per pair

If Rounded Horns are omitted and moulded capping fixed at top of Gates, 2 /— extra. Prices for other sizes on application.

Prices and designs of Gate Posts will be found on page 151, and for Gate Hinges and latches on pages 256 and 257

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

Quotations for special sizes on application. All prices below are for not less than two gates at one time, in 2-in., and see note at foot re other sizes.

If our designs do not suit you, send full particulars of what you want, and we will quote.

	"	4' x 3' 6"	35/3	39/9	35/3	40/6	45/9	43/6

For prices and designs of posts suitable for these Gates, see page 151; and for Hinges, Latches, etc., pages 255 and 257.

All Gates are well made from good materials. For other designs see pages 144-150. We only stock (except we find a special demand) Gates in deal 2-in. thick, and where less than six, 2½-in. or 3-in., are ordered, we make a slight extra charge. This rule will apply to Pitchpine and Oak Gates also, in every thickness-size and pattern above mentioned.

For the convenience of customers wishing to telegraph orders, we have adopted **code letters** for the 2-in. Deal Gates referred to above. Example: If you want ten gates of pattern 2650, 3' 6" x 3' x 2" in Deal, telegraph "Ten A."

WOOD GATES.

No. 2660.

No. 2661.

No. 2662.

No. 2663.

Nos. 2661 and 2662 are simply ledged and braced (when ordering see remarks *re* hand, page 40), the one having a nosed and weathered capping, and the other being notched. Prices are as follows for either pattern:— 4ft. X 2ft. 6in., 5/- each; 5ft. X 2ft. 6in., 5/9 each. Prices for the other Gates are as follows:—

All prices are for not less than two Posts at one time. Where Deal quality is ordered, we reserve the right to use Memel or Oregon Pine, or any other suitable material we may have in stock at the time, seeing that Deal cannot be obtained thicker than 4-in.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

GARDEN SEATS.

No. 2684.

No. 2684.—Garden Seat, 6-ft. long, strongly made.

Price—

In Deal..	£1	4	0	each
„ Oak ..	2	5	0	„
„ Teak ..	2	12	0	„

When Deal Seats are ordered they can be primed for 2/- each extra.

No. 2685.—Garden Seat, 4 ft. long.

Price—

In Deal, including priming ..	9	6	each
„ Pitchpine, varnished ..	13	/-	„

This Seat can be folded if necessary.
Longer Seats at proportionate prices.

No. 2685.

No. 2686.

No. 2686.—Comfortable Seat, suitable for public or private gardens, lawns, etc. Standards are of cast iron, to which the pitchpine laths are bolted.

Price (including varnishing laths and painting standards), up to 6-ft. long—£1 15s. each.

Standards only—10/- per pair.

Nos. 2686 and 2687 can be taken apart and bundled for transit. By this means possible damage may be avoided.

No. 2687.—Strong Seat, with cast iron Standards and pitchpine laths bolted at ends.

Price (including painting standards and varnishing laths), up to 6-ft. long—£1 13s. each.

Standards only 10/- per pair.

No. 2687.

It may be necessary, at times, to vary the patterns of the standards, but they will always be sufficiently strong.

We do not agree always to supply small quantities at above prices.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

SHELTERS AND SUMMER HOUSES.

No. 2695.

No. 2695.—Shelter, suitable for the treatment of Consumption. Size: 6-ft. wide \times 8-ft. \times 6-ft. high at eaves. Specification:—Sides and roof of 1-in. matchboard on suitable framework, floor of 1-in. tongued and grooved boards, well supported on joists. Roof boards covered with tarred felt. The upper part of each side is hinged at the top to open out, with necessary stays, etc., fitted.

Price £9 10s. each, including priming.

This Shelter can be fitted with revolving gear from 20/- extra, an arrangement which permits the house to be easily revolved to any position, as may be rendered necessary by the direction of the wind.

The roof may be covered with ruberoid (or similar material) in lieu of tarred felt for 15/- extra. Shelters with panelled sides and back, £2 5s. extra. Quotations for special designs or sizes on application.

Portable houses which are too large to be conveniently sent (completed) by rail, are made in sections, which may be easily erected on arrival. Any special requirements must be mentioned when ordering, as otherwise we shall presume that everything is left to our judgement.

The two houses shewn on this page can be treated with **Carbojen** (registered) Wood Preservative, for 5/- each extra. This process prolongs the life of the house, and renders painting unnecessary.

No. 2696.—Summer House, 6-ft. wide at front \times 4-ft. deep. Strongly made with 1-in. matchboard, 1-in. floor on suitable joists, trellis-work in front as shewn, roof covered with tarred felt, seats around inside.

Price £5 5s., including priming.

A door can be fitted for 12/9 extra. If ruberoid (or similar material) is used instead of tarred felt, 10/- extra.

No. 2696.

We shall be pleased to quote for Summer Houses of any size or shape, on receipt of full particulars.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

SUMMER-HOUSES.

No. 2705.—Octagonal Summer-house, 7-ft. diameter \times 6-ft. 6-in. high at eaves. Properly framed together, and finished in a workman-like manner. The roof is covered with tarred felt, unless arrangements are made to the contrary.

Price for Woodwork and felt only—£14 10s.

Extra for Ruberoid or similar material			
on roof	12/6		
.. .. sufficient 21-oz. Glass for			
glazing	30/-		
.. .. Tinted figured rolled for			
glazing	45/-		

No. 2705.

The roof can be finished with weather-board instead of felt without extra charge.

This house looks well in varnished pitchpine, and we shall be pleased to quote prices for that specification.

Prices for every description of Summer-house in all styles. For particulars of other portable buildings, in wood and iron, see pages — to —.

We shall be pleased to quote for the designs on these pages in special sizes. Both these houses have seats fitted around the interior.

No. 2706.

No. 2706 is a well-constructed Summer-house, 8-ft. in diameter \times 7-ft. 6-in. high at eaves. The roof is weather-boarded, a neat cornice being fixed at eaves if shutting is not required.

Price in Deal (for woodwork only)—£12.

Extra for sufficient 21-oz. Glass for	
glazing the house ..	32/-
If Tinted figured rolled ..	48/-

This Summer-house is very suitable for use as a tabernacle during the annual Jewish Festival. For this purpose the sides would have to be made removable, and the sections of the roof would be hinged. Extra cost for adapting the house in this way, 25/-.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

TABLES, TRESTLES, HAYRACK & MANGER.

Portable Table Top.

No. 2712.

No. 2712.—Table Top made with 1-in. tongued and grooved boards, ledged at back.

Price 5d. per ft. super.

Hinged Trestle.

No. 2713.—Hinged and Corded Table Trestle, 2-ft. 4 in. high when open, and 2-ft. wide at top.
Price for quantitles, 2/9 each.

No. 2713.

No. 2714.

No. 2714.—Kitchen Tables in deal, with 3-in. turned legs and one drawer. Prices as follows:—

3-ft. 6-in. X 2-ft. 9-in.	12/6 each
4-ft. 0-in. X 3-ft. 0-in.	13/6 ..
4-ft. 6-in. X 3-ft. 6-in.	14/6 ..

4-in. legs 2/6 extra.

No. 2715.—Hay Rack, 3-ft. high, top and bottom 3 X 3, with 1½ square bars fixed diagonally.

Price 1/2 per lineal ft.

No. 2715.

No. 2716.

No. 2716.—Manger (in Hardwood). Specification:—11-in. X 1-in. front and back, 16-in. bottom, width across top, 20-in.

Price 1/8 per lineal ft.

Prices for any of the articles on this page to special sizes on application.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

GREENHOUSES, Etc.

No. 2720.

No. 2720.—Span-Roof Greenhouse, in red deal throughout. Height to eaves 5-ft. 6-in., the lower parts of sides and ends being filled with matchboards. A flat stage is supplied for each side and one end. Prices for complete woodwork (with all necessary hinges, stays, quadrants, sashcords, lock, etc.) as follows:—

Length.	Width.	Price.	Extra for 21-oz. glass cut to size.
8-ft.	5 ft.	£5 15 0	£1 12 6
10-ft.	7 ft.	7 15 0	2 7 6
14-ft.	8-ft.	10 10 0	4 0 0
20-ft.	10-ft.	14 5 0	6 0 0

All Prices include for a coat of priming.

In making these houses we use substantial material, graded in sizes, according to the dimensions of the structure. Prices for special designs and specifications on application. Tarred sleepers for placing beneath the framework, 4d. per lineal ft. Customers should note that our greenhouses are properly constructed by joiners.

No. 2721.

No. 2721.—Lean-to Greenhouse. Height to eaves 5-ft. 6-in., matchboard fitted to lower part, flat staging for inside, etc., as in No. 2720. Prices as follows:—

Length.	Width.	Price.	Extra for 21-oz. glass cut to size.
8-ft.	5-ft.	£4 15 0	£1 10 0
10-ft.	7-ft.	6 8 0	2 5 0
14-ft.	8-ft.	8 2 6	3 10 0
20-ft.	10-ft.	11 10 0	5 0 0

These houses are sent away in as large sections as possible, and are easily erected. 10% reduction if prepared to rest on brickwork.

No. 2722.

No. 2722.—Garden Lights and Frames. Specification:—1-in. Matchboard frame, 2-in. lights—all primed. The frame is knocked apart before being sent away. The height at front is 12-in. overall and 20-in. at back. Prices as follows:—

	Woodwork only, primed.	Including Glass cut to size and packed.	Glazed complete.
1 light and frame 6-ft. x 4-ft.	£0 19 0	£1 6 0	£1 7 6
2 " " 6-ft. x 8-ft.	1 15 0	2 10 0	2 13 0
3 " " 6-ft. x 12-ft.	2 5 6	3 5 6	3 11 6

With 1½-in. frame, 5% extra.

No. 2723.—Garden Lights, strongly framed from 2-in. material. Prices as follows:—

	Lights only.	With Glass cut to size.	Primed one coat and Glazed complete.
6-ft. x 4-ft.	4/9	10/-	12/6
5-ft. x 3-ft.	4/-	8/6	10/9
4-ft. x 3-ft.	3/6	7/-	9/-

No. 2723.

Special prices for large quantities, or for odd sizes not referred to above.

CONSERVATORIES AND PARK SHELTER.

No. 2730.

No. 2730 is a smart-looking Conservatory. It is well-constructed from good materials, and sure to give satisfaction. Flat staging is supplied for the inside. Prices for complete woodwork, including hinges, lock, stays, quadrants, pulleys and cord, as follows:

Length.	Width.	Height to eaves.	Price.	Extra for 21-oz. glass cut to size.
15-ft. ..	10-ft. ..	7-ft. 6-in. ..	£26 5 0	£5 15 0
18-ft. ..	11-ft. ..	7-ft. 6-in. ..	32 0 0	7 0 0
20-ft. ..	12-ft. ..	7-ft. 6-in. ..	38 0 0	8 10 0
25-ft. ..	12-ft. ..	7-ft. 6-in. ..	44 0 0	10 5 0

The roof bars must, of course, be fitted at the site. This house is intended to rest on brickwork, which must be supplied by the Customer.

The use of tinted glass in the fanlights and lantern-light sashes greatly improves the appearance of this house. We can supply this for 10% extra to the prices quoted for glass. Our prices do not include for any special arrangement of opening gear for the top lights. Quotations for any standard system on application.

No. 2731.—Span-roof Conservatory, well made from good materials, flat staging for inside. The ornamentation shewn on the ridge is usually supplied in wood, and that is what we quote for. Prices for iron cresting on application. Prices for complete woodwork (including hinges, fastenings, etc.) as follows:

No. 2731.

Length.	Width.	Height to eaves.	Price.	Extra for 21-oz. glass cut to size.
14-ft. ..	8-ft. ..	6-ft. 0-in. ..	£15 10 0	£4 5 0
18-ft. ..	10-ft. ..	7-ft. 0-in. ..	18 5 0	5 0 0
20-ft. ..	12-ft. ..	7-ft. 6-in. ..	21 10 0	6 10 0
24-ft. ..	14-ft. ..	8-ft. 0-in. ..	25 15 0	7 15 0

Our design shews leaded lights in the upper parts of the sashes. Our prices do not include for this, but we will quote, if necessary. Tinted glass may be used instead of sheet glass, and can be supplied for 10% extra to the prices quoted for glass.

The structures shewn on this page are fitted up and sent away in as large sections as practicable. All prices include for a coat of priming.

No. 2732.

No. 2732.—Park Shelter, 20-ft. x 12-ft. at base, strongly framed together from good materials.

Price for complete woodwork and glass, £58. This includes for fitting up everything as far as is possible before despatch. We shall be pleased to quote prices for fixing these shelters complete at any distance; also for finishing the roof with ruberoid or Eternit tiling.

Prices for special designs on application. For prices of Rainwater goods, suitable for these structures, see pages 260 and 261.

Quotations for fixing in any district on application.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

SIGNS AND NOTICE BOARDS.

No. 2740.

No. 2740.—Single-faced Sign, ledged at back, moulded capping, around edges.

Price 1/1 per ft. super.
Double-faced, 2d. per ft. extra.
Minimum, 12-ft.

No. 2741.

No. 2741.—Same Specification as No. 2740, but with segment head.

Price 2d. per ft. super extra to No. 2740.

No. 2743.

No. 2743.—Church Notice Board. Total height 7-ft. 6-in., the sign being 4-ft. 6-in. x 2-ft. 6-in.

Price £2 12s. 6d.

This board is supported on a strong stop-chamfered post, and is well strutted.

No. 2742.

No. 2742.—7-ft. wide x 3-ft. high at sides.
Specification same as for No. 2740.

Price :—Single-faced, 1/6 per ft. super;
double-faced, 1/9 per ft., the semicircle being measured as square in each case.

No. 2744.—Church Notice Board, 4-ft. high and 5-ft. wide. It is framed up and stop-chamfered, the panels are strong, and the planted mouldings are bold and effective.

Price :—Single-faced, £1 13s. 6d.;

Sample of Hardwood sent on application.

The Hardwood referred to above in Dado and Picture Rail Moulding is supplied at such a small extra cost that you save more than this for the following reasons: You get a better surface with Hardwood, takes less paint, more durable, and free of knots. This Hardwood can be worked into mouldings of any pattern. Price on application.

All sizes given for planed or worked moulding and timbers are nominal. The finished sizes are slightly less. All prices quoted are for our ordinary quality. Selected quality mouldings for paintwork about 10% extra. Selected for varnish-work about 25% extra (also state quality required). All prices are for Deal unless otherwise stated, but we sometimes have a special kind of Hardwood—see remarks on page 197. Prices about 15% or 20% extra if in stock. Prices for any patterns to any kind of wood quoted on application.

Hardwood prices do not refer to any special Hardwood that a customer might select, but we can quote for mouldings worked in any hardwood. For Picture and Dado Mouldings prepared for Electric Cables, also Electric Casings, see index.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 1.

F 3950A to 3990A shown in sundry places on Pages 192 to 194 may not always be in stock. We show them as designs for any size. Prices would vary according to quantity required, which kindly state. Also we could work them in any kind of soft or hardwood.

Special Whitewood is a special American Whitewood, not "Canary" Dark Satin Walnut will be about 15% extra to Light Satin

PICTURE MOULDS, ETC.

Nos. 3888-3902 Picture Moulds are kept in a large number of sizes (patterns are to show approximate design only; the sizes and pattern would vary considerably), and the prices for all patterns are approximately as follows, but would depend upon the quantity ordered. Special quotation for large lines or to any special pattern.

The lengths would be chiefly 10 to 14 ft. We do not guarantee all 12 ft. Sometimes we have a lot of short material 2 ft. to 4 ft. 6 in. long which we can supply about 10% cheaper.

Price per 144 ft. :-

Width	Deal	Oak (Plain)	Oak (Figd.)	Satin Walnut	Black Walnut	Maple Veneered

Whitewood, pine, and satin walnut (unless already quoted in these woods) can be supplied in a large number of above sizes and patterns for 10% to 20% less than oak, walnut and mahogany, according to quantity and pattern required. Other sizes can be supplied in similar patterns to those shown on Page 169. Patterns on Page 169 are approximate designs as the patterns may alter slightly. If the pattern you require is not shown, refer us to the nearest pattern, and state what size and alteration is required.

HAND CARVED TRUSSES, FOR SIDEBOARDS, BOOKCASES, COUNTERS, ETC.

(We reserve the right to vary the design slightly).

FENCING.

OPEN PALING FENCING (Angle Pales).

OPEN PALING FENCING (Flat Pales).

SPECIFICATION No. 1.—Paling Fencing as No. 4021, Posts (D), 4×3 , 2 Horizontal Angle Rails (C), as No. 4023, Angle Palings (E), approximate size placed 2 in. apart and pointed.

SPECIFICATION No. 2.—Paling Fencing as No. 4021, Posts (D) 4×3 , 2 Horizontal Angle Rails (C), as No. 4023; Angle Palings $1\frac{1}{4}$ in. apart (E), approximate size, 2 in. by $\frac{3}{4}$ angled.

SPECIFICATION No. 3.—Paling Fencing as No. 4021, Posts (D) 4×3 , 2 Horizontal Angle Rails (C) No. 4023; 3 in. by $\frac{3}{4}$ in., Flat Palings (3 in. apart) pointed.

SPECIFICATION No. 4.—Paling Fencing as No. 4021, Posts (D), 4×3 , 2 Horizontal Rails (C) as No. 4023, $3 \times \frac{5}{8}$, Flat Palings (2 in. apart) pointed as in Design No. 4021.

SPECIFICATION No. 5.—Paling Fencing as No. 4021, Posts (D) 4×3 , 2 Horizontal Rails (C) as No. 4023, $3 \times \frac{7}{8}$, Flat Palings (3 in. apart), pointed as in Design No. 4021.

SPECIFICATION No. 6.—Paling Fencing as No. 4021, Posts (D) 4×3 , 2 Horizontal Rails (C) as No. 4023, $3 \times \frac{7}{8}$ Flat Palings ($1\frac{1}{2}$ in. apart), pointed as in Design No. 4021.

Prices quoted are at per yard run of Fencing for Deal. Material sawn only, each with 2 Horizontal Rails.

No. 4011.

CLOSE BOARD FENCING.

SPECIFICATION No. 7.—Fencing as No. 4011, Posts (D) 4×3 , 2 Horizontal Rails (C) as No. 4023; $\frac{1}{2}$ in. Boarding 4 or 5 in. our option as to width.

SPECIFICATION No. 8.—Exactly as No. 7, only boards tapered in thickness $\frac{1}{2}$ in. one edge to $\frac{3}{8}$ in. on other side (see section J).

CLOSE BOARD FENCING EXTRAS (Deal).

Deal Capping on Close Board Fencing size 2 in. \times 1 in. grooved and bevelled about $4\frac{1}{2}$ d. per yard run extra. 2 in. \times $1\frac{1}{2}$ in. from 6d. yard run extra.

Caps (A) on Top Post to stand above Fencing and to match Capping 5 in. \times 4 in., about 1/- each. 6 in. \times 5 in. \times $1\frac{1}{2}$ in., about $1\frac{1}{4}$ each.

Horizontal Gravel Board to fix at ground level, 4 in. \times $\frac{5}{8}$ in., about $\frac{3}{4}$ d. foot. 5 in. \times $\frac{7}{8}$ in., about 1d. foot.

For extra size Posts add percentage on to cost of Fence, or apply for Special Price to your Specification.

If our Specifications do not meet your case, we shall be pleased to quote for Fencing to special details, or in any other Woods, such as Larch, Pitchpine or Jarrah.

Prices for Gates or Fancy Gates (see pages 144 to 150) on application, stating size and quantity required.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

Selected Quality 10% extra.

If Angle Rails are heavier as No. 4024, add 1 1/2 d. yard to any of above prices.

No. 4025 " 4d. " " "

If Posts are heavier, add extras as follows over 4 in. x 3 in. in above Specification (approximate) :—5 x 3, 4% ; 6 x 3 or 4 x 4, 7% ; 7 x 3 or 5 x 4, 10% ; 6 x 4, 15% ; 7 x 4, 20% extra to the value of Fencing shewn above.

Extra for Creosoting by Dipping (Dark Colour), 20% on to previous prices of Timber only.

Extra for Creosoting by Force at 120 lbs. pressure to force the Creosote right into the Timber (dark colour), 30% on.

Extra for 1 coat of our Light Brown Preservative CARBOJEN (registered) instead of Dark Creosote, 25% on.

Extra for Notching Posts as section Y, rails run right through on face of posts

Distance of posts apart.

8ft. 10ft. 12ft.

1d. 3/4d. 1/2d. yard

Extra for Tenoning Rails and Morticing Posts as section X, so that rails will stand back far enough for the posts to act as palings. The morticing if preferred can be done so as to bring rails and posts flush (please specify which you prefer)

2d. 1 1/2d. 1 1/4d. "

If as Z, no morticing, tenoning, or notching required, therefore no extra charge. Rails are nailed direct on to posts.

Where Fencing is required, **planed for painting**, the price would be about 20% extra.

Fencing as Design No. 4025 same price as No. 4021, Specification 1 to 6, i.e., it is the same description of fence, only the palings fixed on the slant.

Sawn Oak Fencing can be supplied at approximately double the price of Deal in any of the sizes or specifications.

Cleft Oak Close Boarding (lapped) sawn oak Rails and Posts double the price of Deal with further addition of 5% for cleft palings.

When preparing your order or further enquiry, please read our specifications very carefully, and set down clearly what you require. This will prevent mistakes and save delay.

The Pales in this fencing are of pitchpine 2in. wide by ¾in. thick, neatly sawn and pointed, and the wires are the same as used for our Cleft Chestnut Paling. The posts are of red (yellow) deal.

There are two lines of wire to Fence No. 4032 up to 4ft. high, and three lines to all greater heights of this fence.

The Pales can be planed for painting if required. Price on application.

WITH TRIANGULAR SAWN OAK PALES.

Prices per Yard (including posts 9 ft. apart).

The Pales of this fence are of oak, about 2in. wide on face, neatly sawn and pointed, while the wires are the same as used for our Cleft Chestnut Paling. There are two lines of wire to Fence No. 4033 up to 4ft. high, and three lines to all greater heights. The posts are of oak also.

For prices of Gates to match, see page 206.

No. 4033.

No. 4034.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

Three-fourths of the Pales in this fence are clear of the ground, and those touching the ground are extra stout, well-grown ones. This increases its durability, and enables sheep to crop the grass close under it. These prices include round posts for placing 9-ft. apart, and one square straining post and strut per 100 yards.

For prices of additional posts see page 209.

Pales with blunt tops instead of points can be supplied for any of the fences on this page (if specially ordered) without extra charge.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

CLEFT CHESTNUT PALING—Con.

Pales reaching Top and Bottom of Fence alternately. Two lines of wire.

Prices per yard without Posts.					Prices per yard including Posts.

For prices of additional posts, see page 209. For Gates to match, see page 206.

Pales full height. Four lines of wire.

No. 4062.

This makes a particularly strong and rigid fence, the four lines of wire holding the pales tightly at short intervals. This fence can be confidently recommended against heavy stock; and also makes an excellent boundary fence, provided the pales are placed sufficiently close to afford no foothold between them.

Pales with blunt tops instead of points can be supplied without extra charge if specially ordered.

Prices per yard, including posts.

Prices per yd., without posts.

Height of Fence.	Distance apart of Pales.				Distance apart of Pales.

No. 4072

Every Pale in this Fence, in addition to being very tightly stranded, is securely stapled to both top and bottom wires, so that the Fence can be readily taken up and refixed without injury, thus making it greatly superior to wooden hurdles or wire netting.

This pattern can be recommended also for enclosing building plots, or for any purpose where a cheap and easily-removable Fence is required.

CLOSE CHESTNUT PALING.

No. 4081

SQUARE TOPS.

No. 4082

No. 4083
BATTLEMENTED TOPS.

No. 4084

No. 4085

This makes a cheap and efficient substitute for an oak park paling, the Pales being woven together as close as it is possible to get them, in most cases actually touching.

Broad, stout Pales are used for this Fence, and the Fence is very substantial and rigid.

POSTS.—As this Fence is of considerable weight and presents a large surface to wind pressure, it is desirable to place stout posts 6-ft. apart, and prices are quoted accordingly.

Quotations are also given below for square posts 6-ft. apart; as in some situations, where neatness of appearance on the inside of the fence is a consideration they may be preferred.

Fences under 3-ft. 6-in. have two lines of wire; those 3½-ft. to 5-ft. high have 3 lines; while the 5-ft. 6-in. and 6-ft. heights have 4 lines.

Prices of Gates include hangings for wood posts and latch with catch.

If fitted with mortice lock and drop handle, 7/6 extra.

Field Gate 2/6 extra if 10-ft. wide.

If Field Gates made in 2 leaves with 2 sets of hangings, 5/- extra. Drop bolt and oak centre stop, 3/6 extra.

Gates can often be placed so as to hang or shut to one of the straining posts so saving the cost of one gate post.

No. 4085 is Front View. Other designs are Back View.

Prices per yard for any of the three patterns—

4ft. 6in.	2/3	2/7	2/11	3/4
5ft.	2/6	2/11	3/4	3/9

Hurdles can be made to any required length.

Very useful for Garden Fences, also for short-lengths, filling gaps, etc. Hurdles under 3ft. 6in. high have two rails; all other heights have three rails as shown. Hurdles with three rails can have alternate pales reaching to middle rail only, at 5 per cent. less than prices quoted. Pales with blunt tops instead of points can be supplied without extra charge, if specially ordered.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

CLEFT CHESTNUT PALE TREE-GUARDS.

Prices of Tree Guard do not include for Netting as shown. Galvanized Wire Netting $1\frac{1}{2}$ in. mesh, 3ft. wide, 18 WG can be cut to lengths and fastened on to the Pales at extras as under :—

Tree Guards—		each
12in. diam.	..	8½d.

Tree Guards can be made from any of the patterns of Cleft Chestnut Paling shown in our list at prices similar to the above, or where a still neater and straighter pattern is desired, from Sawn Oak Triangular Pales.

These Tree Guards are made from selected Cleft Chestnut Pales, as straight and stout as possible, with good resisting power. They are secured to flexible iron rails, which are made in one piece, and can be opened easily to admit the tree. To three of the Pales are secured angle iron feet, pointed for driving, and sufficiently long to give good hold in the ground. All Tree Guards 24in. in diameter.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

CONTINUOUS BAR FENCING WITH H IRON STANDARDS.

The strongest and most massive Bar Fence in the market.

SQUARE BAR WROUGHT IRON UNCLIMB- ABLE RAILING WITH SHARP POINTS OR SPEAR HEADS.

No. 5050.

Standards 9 ft. apart are provided with anchor feet, as shown, with left-hand Standard, which gives the Fence a very firm hold in the ground, and enables it to be fixed close to a boundary

Prices per yard, including Stay to each Standard—

No.	Size of H Standards.	Width of A-Rails fixed.	Size of Verticals.	Height above ground.					
				3½ ft.	4 ft.	4½ ft.	5 ft.	5½ ft.	6 ft.
5050	1½ × 1 × 1 in.	1½ in.	½ in. sq.	4/8	5/-	5/6	—	—	—
	2 × 1½ × 1½ in.	1½ in.	¾ in. sq.	5/6	5/11	6/5	7/-	—	—
	2 × 1½ × 1½ in.	2½ in.	¾ in. sq.	—	—	7/-	7/7	8/2	8/9

In loose, light, or sandy soils a plate foot is recommended at an increased cost of 2d. per yard. T-Standards with earthplates as shown, can be substituted without extra charge, if preferred.

Verticals ½ in. square, set 4 in. apart, ¾ in. square are set about 4½ in. apart, and ¾ in. square 4½ in. apart in the clear.

They can have sharp points, or blunt tops (as shown at left of Standard) without extra charge.

If alternate bars are provided with spear heads (as shown with hurdles on page 215), 3½d. per yard extra, or if all bars speared, 6½d. per yard extra. For prices of Gates and Pillars to match, see below.

LIGHT HURDLES.—Nos. 5090, 5091, 5092 and 5093 have Standards 1½ × ½ in., and Horizontals 1 × 1½ in. Verticals ½ in. dia. 1½ in. apart. There are three Horizontals to all Hurdles.

STRONG HURDLES.—Nos. 5094 and 5095 have Frames 1½ × 1½ in., and Verticals ¾ in. dia. 2 in. apart. Hurdles 3 ft. high and over have three Horizontals.

Prices of gates include hangings for wood or stone. If made to hang to hurdles (as shown), 2/9 extra, with two stronger End Standards and one stay.

Wrought Iron Self-fixing Pillars, as shown, 19/9 per pair.

PAIR FIELD OR FARMYARD GATES AND HAND GATES.

No. 5097.

No. 5098.

Cast Iron Centre Stop with fall-down lid, 5/6 extra.

Wrought Iron Centre Stop with fixed lip, 2/9 extra.

If Dog Bars, ¾ in. × ½ in. × 2ft. 6in. long are rivetted on, about 2½ in. apart as shown, the extra cost will be 16/6 per pair gates, and 5/6 for hand gate.

If Gates fitted with ordinary latch, as well as slip bolt, 2/9 extra. Gates made self-shutting, 2/9 extra.

Hand Gate, No. 5098, can be made with either round or flat lower bars at same price, and fitted with either slip bolt for padlock or latch.

PRICES EACH (exclusive of Dog Bars).

	3ft. 10in. high.	4ft. 5in. high.
Pair Gates only, 10 ft. wide (if 9 ft. wide 1/8 less) ..	£2 1 3	£2 4 0
Hand Gate only, 3½ ft. wide (if with round bars same price)	0 18 3	0 19 9
Gate Pillars with self-fixing bases	0 16 6	0 17 9

The construction of this pair of Gates is similar to No. 5084, consisting of square heel bars, T-iron top and bottom bars, 1 in. × ½ in. inner bars, angle iron braces and strengthening plates at corners. Gates 4 ft. 6 in. high have five inner bars. All Gates are fitted with hangings for iron, wood, or stone, slip bolt for padlock and drop bolt. Pairs of Gates with round inner bars (constructed similar to No. 5082) if preferred can be supplied at an extra of 5/6 over the price of the flat bar gates.

NEW PORTABLE STEEL WIRE FENCING.

For Poultry Runs, Pheasantries, Rabbit Warrens, Deer Parks, Tennis Courts, etc. Also for Protection of Gardens, Orchards and Shrubberies For Kennels it is the cheapest efficient Fence yet advised. Strongly recommended.

No. 5100.

No. 5101.

The horizontals are of Galvanized Strand Wire, No. 8WG, from 10 to 12 in. apart. The rods are hard steel, galvanized No. 9WG, for light fence. Where rods are alternately long and short the latter are made 3 ft. in length, unless otherwise ordered.

The prices of Standards are given separately, as some purchasers prefer to substitute wood posts. The uprights should be placed 6 or 7 ft. apart for kennel fencing, but for other purposes they may be from 8 to 10 ft. apart.

Lengths of fence shorter than 10 yards can be made specially to order at an extra cost of 10%.

This fence can be made with bowed tops of various ornamental patterns at an extra cost of 3½d. per yard.

STRAINED WIRE FENCE WITH SQUARE IRON TOP BAR.

Cheaper than Bar Fencing.

Stronger than Wire Fencing.

No. 5110.

Makes a handsome fence, and is easily seen by cattle and horses. Very suitable for carriage drives, etc., where a strong and yet unobtrusive fence is required. Can be curved to any sweep, and dispenses with stays that are a source of danger to stock.

SPECIFICATION.—Standards of H iron (see page 213 for half-size section), 3½ ft. apart, to drive 2 ft. in ground; top bar ½ in. square, set edge-ways (giving 7/8 in. diagonal to view); wire of No. 6 × 7-ply Galvanized Strand; one strong Wrought Iron Straining Pillar per 100 yards of fence. 3 ft. 9 in. high with five lower wires, 2/- per yard; 4 ft. high with six lower wires, 2/2 per yard.

PORTABLE CATTLEPROOF CRICKET FENCE.

Preserves Cricket Enclosures from Cattle, while admitting Sheep to keep the turf cropped.

Prices per yard—

No. 5112		
With 1 line of Strand	..	1/1
" 2 "	..	1/4½
No. 5113		
With 1 line of Chain	..	1/10
" 2 "	..	2/4½

No. 5112. No. 5113.

Barbed Wire can be supplied at same price as Strand.
Spiked Chain can be supplied at 4½d. per yard per line.
Stay and Socket for corner, 4/5 extra.
Iron Caps for Socket when not in use 5/- per dozen.
Higher Fences or more Wires, prices on application.

IMPROVED STRAINED WIRE FENCING 6 ft. High, for Deer Parks.

Strong, Efficient and Durable. Proof against the smallest Deer and Fawns.

No 5114. No. 5115.

SPECIFICATION.—All Fences have 12 lines of Galvanized Wire, strong T-iron standards, each provided with earthplate, H-steel droppers, and one strong wrought iron straining pillar per 100 yards of fence.

FIXING of either fence, 4½d. per yard, purchaser providing one labourer. Fixer's fares charged extra if order is less than 500 yards.

With Solid Steel Wire, galvanized	7½d.	8½d.	9d.
„ Strand „	8½d.	8½d.	9½d.

No. 5121.—4 ft. high. Against Heavy Cattle, Sheep and Lambs. Seven wires.

PRICES PER YARD.

Standards apart	24ft.	18ft.	12ft.
Number of Droppers between	3	2	1
With Solid Steel Wire, galvanized	10½d.	11½d.	1/1½
„ Strand „	11½d.	1/0½	1/2

No. 5120 has Standards 1½ × 1½ × ⅜ in. or equal. T or L section, and lower wires, No. 7 W.G. No. 5121 has T Standards.

Both fences have two top wires, barbed, and droppers 6 ft. apart. All prices include one Wrought Iron Straining Pillar per 100 yards.

GALVANIZED BARBED WIRE, WITH STRONG T-IRON STANDARDS.

No. 5122 PRICES PER YARD (for Illustration see page 224)

Height above ground	3½ ft.	4ft.	4½ ft.	5ft.
Depth in ground	1½ ft.	2ft.	2ft.	2½ ft.
Number of Wires	4	5	6	7
Standards 18 ft. apart, with 2 droppers	7d.	8½d.	9d.	11d.
„ 12 ft. „ „ 1 „	8d.	9½d.	10½d.	1/-
„ 9 ft. „ without dropper	8½d.	9½d.	10½d.	1/0½
Erection, purchaser providing one labourer	2½d.	2½d.	3d.	3½d.

Standards of strong T or L iron, 1½ × 1½ × ⅜ in., to drive 1½ to 2½ ft. in ground, Steel Droppers 6 ft. apart, one Iron Straining Pillar per 100 yards of fence. Galvanized 4-pointed Barbed Wire, barbs 6 in. apart.

This makes one of the cheapest fences that can be constructed, as not being liable to damage by rubbing of cattle, it does not need standards as heavy or as close together as does a plain wire fence.

When required against sheep the lower wires can be galvanized solid wire No. 6 W.G. or of galvanized strand wire No. 8 at the same price.

WIRE FENCING FOR LAWN TENNIS GROUNDS AND POULTRY RUNS.

No. 5165.

No. 5165.

This is the cheapest method of enclosing Tennis Grounds, being much less expensive than Hurdles, while it is equally as efficient and durable.

This Fence consists of strong T Iron Standards, 12 ft. apart, and four or five lines of Galvanized 7-ply Strand Wire, the whole Fence being covered with Galvanized Steel Wire Netting, 2 in. mesh, and 18 W.G. (Medium).

Extra strong Posts with stays are required at corners, and terminals for straining wires.

A plan of the ground to be fenced should accompany all inquiries or orders.

Where required for Poultry Runs the Netting can be made 1-in. mesh at bottom, 2 ft. wide, at an extra cost of 1½d. per yard.

Height above ground	6 ft.	7 ft.	8 ft.
Fencing per yd.	1/0½	1/2½	1/5
Hand Gate, 3½' wide each	16/6	18/2	19/9½
Terminal Post with stay	17/7	19/9½	22/-
Gate Post	19/9½	22/-	24/2½
Corner Post with 2 stays	22/-	24/9	27/6

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

CONSOLIDATED WOVEN WIRE FENCING, with Iron Standards.

No. 5130

No. 5132 has consolidated fencing, 2 ft. 11½ in. wide, with six horizontal wires, top and bottom No. 7 W.G., rest No. 9 W.G., and verticals No. 10 W.G., 12 in. apart. One line of galvanizing barbed wire above; L-iron 2ft. standards 1½ × 1½ × ⅜ in. for driving in ground 12 ft. apart, and one wrought iron straining pillar per 100 yards of fence.
1/0¾ per yard.

No. 5132

No. 5134

No. 5134 has consolidated fencing 3 ft. 9 in. wide, with eight horizontal wires, top and bottom No. 7 W.G., rest No. 9 W.G., and verticals No. 10 W.G., 12 in. apart. One line of galvanized barbed wire above; L-iron standards 1½ × 1½ × ⅜ in. for driving 2½ ft. in ground 12 ft. apart, and one wrought iron straining pillar per 100 yards of fence.
1/2¾ per yard.

Prices, each including Hangings for Wood Posts—

Field Gate, 9 ft. wide, in one leaf, as shown (No. 5136)—

4 ft. high, 27/6; 4½ ft., 30/3

Field Gate, 9 ft. wide, in two leaves—

4 ft. high, 38/6; 4½ ft., 41/3

Hand Gate, 3½ ft. wide—

4 ft. high, 18/1¾; 4½ ft., 19/3.

Cast Iron, self-fixing pillars, per pair—

4 ft. high, 33/-; 4½ ft., 35/2.

No. 5136

These gates are all made with strong T-steel frames, securely braced, and having plates at all corners. Very strong, neat and durable.

If Field Gates made 10 ft. wide, 1/9 extra.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8

STRAINED IRON RABBIT WARREN FENCING With Iron Standards.

Proof also against Horses, Cattle and Sheep.

No. 5160.

Price per Yard—Standards 12 ft. apart $1/0\frac{1}{2}$. 10 ft. apart $1/1\frac{1}{2}$. 8 ft. apart $1/2\frac{1}{2}$.

This Fence stands 3 ft. 6 in. high above ground, and consists of strong T iron Standards, $1\frac{1}{2} \times 1\frac{1}{2} \times \frac{3}{16}$ in. or equal, to drive 2 ft. in ground, three lines of Galvanized 7-ply Strand Wire No. 8 W.G., and a top line of Galvanized Barbed Wire. To the Strand Wires is fastened Galvanized Wire Netting, $1\frac{1}{2}$ in. mesh, 18 W.G. (medium quality), $3\frac{1}{2}$ ft. wide for standing 3 ft. above ground and pegging 6 in. along surface or trenching 6 in. deep. One strong Wrought iron Straining Pillar per 100 yards of fence is provided.

If Netting No. 17 Gauge, 1d. per yard extra.

STRAINED WIRE MOUNTAIN SHEEP AND CATTLE FENCES.

No. 5162. Sheep and Lambs.

No. 5163. Sheep and Cattle.

Fence No. 5162. Against Sheep and Lambs only.

Fence 3 ft. 4 in. high, with four lower wires No. 8 W.G., top barbed, T or L.

Standards, $1\frac{1}{4} \times 1\frac{1}{4} \times \frac{3}{16}$ in. to drive 1 ft. 8 in. in ground.

Standards apart	12ft.	10ft.	8ft.
With Solid Steel Wire, galvanized	8 $\frac{1}{2}$ d.	9 $\frac{1}{2}$ d.	10 $\frac{1}{2}$ d.
With Steel Strand Wire	9 $\frac{1}{2}$ d.	10 $\frac{1}{2}$ d.	11d.

Fence No. 5163. Against Sheep and Cattle.

Fence 3 ft. 9 in. high, with four lower wires No. 6 W.G., top barbed, T or L.

Standards, $1\frac{1}{2} \times 1\frac{1}{2} \times \frac{3}{16}$ in. to drive 2 ft. 3 in. in ground.

Standards apart	10ft.	8ft.	6ft.
With Solid Steel Wire, galvanized	1/-	1/1 $\frac{1}{2}$	1/3
With Steel Strand Wire	1/0 $\frac{1}{2}$	1/1 $\frac{1}{2}$	1/3 $\frac{1}{2}$

This can be recommended as a cheap and efficient Sheep Fence. It has galvanized Wire Netting, 4-in. mesh, 16 W.G., 2 ft. wide for fastening to the lower wires, as shown, and one Wrought Iron Straining Pillar per 100 yards of Fence.

INLAID PARQUETRY.

FLOORING FOR MANSIONS OR VILLAS.

For dark, hard floor, **Greenheart** forms an excellent substitute for teak, or superior to walnut for parquetry laid on top of ordinary flooring board.

Borders can be supplied with **several Colours** (different kinds of wood). Samples at our office, or by special arrangement samples can be submitted.

SPECIAL CHEAP LINE.—You will notice the 6-in. blocks (see Designs 5017 and 5018) are much cheaper *pro rata* than 9-in. and 12-in. in the Red Deal. 6-in. can be supplied in some other woods, but the price would be, perhaps, more instead of less.

If order is given for 2nd quality Blocks, 10% less than prices above.

Greenheart can be supplied at approximately 5 to 10% less than teak. For the Special Water-Resisting quality of Greenheart, see page 243.

Above prices are based upon quantities of 150-200 yards of a sort.

Smaller quantities can, however, be supplied. Prices on application.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

WOOD BLOCK FLOORING.

No. 5016

No. 5017

No. 5018

HERRING BONE & Border
Scale Drawn for
8-in. × 3-in. Blocks.

HERRING BONE & Border
Scale Drawn for
6-in. × 3-in. Blocks.

DIAMOND & Border
Scale Drawn for
6-in. × 3-in. Blocks.

The 6-in. Blocks are quoted at a reduction of about 5% off price of 9-in. and 12-in. Red Deal and Pitchpine Blocks only.

The prices for laying will be the same per yard as for 9-in. and 12-in.

We could supply other kinds of wood in 6-in., but the price may be more than price for 9-in., instead of less.

8-in. × 3-in. Blocks are sometimes in stock, about same prices per yard as for 9-in. × 3-in. and 12-in. × 3-in., and proportionate price per 100 blocks.

When Ordering Blocks, give us an option, where possible, to supply either 6-in., 8-in., 9-in., or 12-in. This may facilitate prompt delivery.

LAYING BLOCKS.—Approximate prices are as follows, but they depend on distance, site, quantity, and other circumstances. State clearly when enquiring:—

- 1st. If site is within free delivery bounds, or how far away, from station.
- 2nd. What is the nearest goods station.
- 3rd. What is nearest passenger station.
- 4th. Shapes and sizes of rooms. Rough sketch, plans preferred. Whether skirting is fixed—it is better to fix the skirting after blocks are laid.
- 5th. Total quantity yards, and if they can be all laid together, and immediately following on, while our men are on the site.

Extra, for laying only, 500-yd. Lot, mastic bitumen, railway fares (United Kingdom) and expenses included.

	Deal.	Pitchpine.	Maple.	Oak.	Teak.
Square (as patterns 5013—per yd.)	1/10	2/-	2/1	2/2	2/4
Basket 5014 „	1/11	2/1	2/2	2/3	2/5
Herring-Bone 5011 „	2/-	2/2	2/3	2/4	2/6

The prices for Laying are based upon a quantity of 500 yards, to be laid in one lot, and in large rooms with no special cutting, and in certain areas; but where smaller lots are required, special quotations are necessary. The smaller the quantity the greater the cost of Laying per yard.

To find prices of Blocks, bitumen mastic, and laying complete upon a bed of concrete, floated perfectly level and smooth, add on the cost of laying to the price per yard of Blocks mentioned, page 234.

Concrete is not included or laid on any occasion, unless specially stated by us. This can be quoted in special cases of need.

Borders—straight, as in Design 5016, will cost 1d. ft. run extra. Other Borders quoted for on application.

2-in. Blocks can be supplied at 20% to 30% extra to the price for 1½-in. Tongued and grooved Blocks can be supplied in some sizes for about 3d. to 6d. per yard extra. Prices on application, stating quantity required.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

SUPPORT BRITISH INDUSTRY.

No. 5025.—NAVY BARROW.

Specification same as for General Purpose Barrow, except that sides are shallower and iron wheels are used.

Price 12/9 each. Tel. code: MOA.

Leg stays fitted at 1/3 barrow extra. We stock a large number of Navy Barrows, and can give prompt despatch. **Special Quotation for Large Quantities.** Iron Wheels for Repairs, Price 2/3 each. Tel. code: MOB.

No. 5025—Side view.

No. 5025—Top view.

No. 5026.

No. 5026.—GENERAL PURPOSE BARROW.

Strongly made from sound hardwood frame morticed and bolted together, wood wheel bonded with iron and the top edges of sides protected with hoop iron. Price for above Specification .. 16/6 each

Extra for fitting iron leg stays, 1/3 per barrow; extra for painting three coats, 3/6 per barrow. Wood wheels for repairs, 4/6 each.

Special Quotations for Large Quantities.

No. 5027.—GARDEN BARROW. Well made from sound hardwood and planed throughout. Wood wheels same as in No. 5026.

Price unpainted, 16/- each; tel. code: MOC.

Painted two coats, 19/6 each; tel. code: MOD.

Leg stays fitted at 1/3 per barrow extra.

No. 5027.

Barrows can be made to any Special Pattern. Price will be dependent upon the quantity ordered. One barrow made to a Special Design will be expensive.

Prices in the knockdown (not bolted together), shaped, morticed, bored, bolts and nuts included, deduct 1/6 from above prices (code alter first letter M to A). Freight and carriage is decreased in the knockdown.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

LADDERS as No. 5035 (made from spars).

Up to 30 Rongs at	..	7½d. per Rong
31 to 40	..	8½d. "
41 to 50	..	9½d. "

With two or three Iron Bars in same, according to length.

Rongs distanced about 9 in. apart centre to centre.

There is sometimes a difficulty in sending ladders over 22 rongs by rail unless a 2-ton lot of goods is ordered, as it is generally necessary to have two trucks for long ladders. Customers can very often make up 2-ton lots with our many and varied specialities.

No. 5035 No. 5036 No. 5037 This difficulty is not very often met with if goods are going all the way by boat, or if going by rail can go through at leisure when there is two trucks going to the same station loaded with other goods.

SHORT LADDERS made of 2 × 2 sawn quartering sides and 1½ × 1 square sawn Rongs (as No. 5036), 5d. per Rong; 3 × 2 sawn sides and 2 × 1 square sawn Rongs, 6d. per Rong. Machined planed over for 1d. per Rong extra.

STEP-LADDERS (as No. 5037), special quotations on application, as widths vary from 1 ft. 6 in. to 5 ft.; heights from 6 ft. to 12 ft.; going 3 ft. to 10 ft. Size of timber for extremely light ladders could be 6 × 1½ sides, 7 × 1½ treads. Heavy ladders could be 11 × 3 sides, 11 × 3 treads.

When ordering, kindly give going B, rise A, and also distance steps must be apart, as step-ladder used for carrying up heavy weight should be spaced at a less distance than one for light weights. Also state sizes of timber, whether planed or unplaned, width overall, and if a bolt required each end, one in centre if specially long.

DEAL is always quoted, unless Hardwood is required such as Elm, Oak, Teak, etc.

CREOSOTED STEP-LADDERS can be supplied, creosote forced right into timber, for about 10% extra. This is valuable where steps have to stay out in weather.

No. 5040

CONTRACTOR'S or PAINTER'S TRESTLES.

Can be made to any size. Prices on application.

No. 5038. Stock Size—About 28 in. wide at bottom and 22 in. wide at top.

10 ft. high	..	17/6 each
9 ft.	..	15/- "
8 ft.	..	12/6 "

Taking two or more.

Specification: 3 × 2 framing, hinged at top, cords at bottom, painted one coat.

No. 5038.

No. 5039 HEAVY TYPE PAINTER'S or CONTRACTOR'S STEPS.

8 ft. high	..	10/6 each
7 ft.	..	9/6 "
6 ft.	..	8/6 "

Painted one coat.

CHEAPER HOUSEHOLD STEPS (not so strong)—

Prices on application.

No. 5039.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 11.

PREPARED BOARDS.

IMPORTANT NOTICE.—A Square is 100 nominal square feet, so that a matchboard or tongued flooring being 7-in. before it is worked will only cover about 6½-in. or less when it is fixed with tongue fitted in groove, and the space a Square will actually cover is about 90 square feet. In square-edge flooring 7-in. holds up about 6¾-in., and a Square will cover about 95 square feet when laid carefully.

Prices below are per square (100 square feet). Any quantities less than a square would be at advanced prices.

Widths where stated 7-in. we reserve the right to send 6½-in. or 6-in. according to our stock, unless specially arranged. (The extra amount of lineal feet to make up the 100 square feet is sent.)

Nominal			No. 5051 Tongued and Grooved Only				No. 5052 Beaded One Side				No. 5053 Beaded Two Sides

7	x	4	8/6	VCH	9/3	VCM	9/-	VCR	9/9	VCV

Matched and V-Jointed one side, as No. 5054, and two sides, as No. 5055, can be supplied when in stock at same prices as beaded above. Some of our customers consider this V-jointed is easier to paint than beaded. Code alter first letter V to O. Where possible always give us the option to send beaded or V-joint, whichever we have ready for prompt despatch. Where you give us the option, and you wire the order, code is as above, but alter first code letter V to N.

Square-Edge Planed Flooring.

Shelving Boards (square edge planed)

Selected quality for joinery does not mean free of knots, but nearly free of large and loose knots.

Extra sizes to above quoted on application.

It is not always safe to assume without enquiring, but for most sizes not mentioned price would be between the prices for larger and smaller.

1 1/4-in. timber is generally in stock in all widths. 1 3/4-in. timber is sometimes in stock in red, but not always. (Spruce or red can be cut to 1 1/4-in. thick, but will generally be as expensive as 2-in. per 100-ft. run.)

The above prices are for medium lengths.

Short lengths (when in stock in the sizes required), 2-ft. to 4-ft. 6-in. about 7 1/2% less, 5-ft. to 6-ft. about 5% less, 7-ft. to 8-ft. about 2 1/2% less.

Long lengths can be quoted special as they are extra in some sizes when over 17-ft., but if only a small percentage long lengths are ordered in a consignment, we may not charge any extra.

Where long lengths are preferred, but could be sent in two pieces, kindly state what lengths are most suitable, and give us the option.

Battens for roofing, 1 1/2 x 1, 2 x 7/8, 2 x 3/4, etc., are quoted in above list.

Packing Case prices, see page 241. **Shedding Board** prices, see page 241.

Secondhand Planks, see page 241. **Secondhand and New Poles**, see page 241.

Flooring and Shelving Board prices, see page 238.

Timber Prices fluctuate so much that, where there is time, it would be also beneficial to give special enquiries, although the above prices are as near correct as it is possible to insert on a general list.

Prices at per standard or per square, or in any way required, quoted on application.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

SECONDHAND AND NEW.

NEW SCAFFOLD POLES, with tops about 2-in., 1½d. ft. run up to 22 ft. or about 2½-in. tops, 1½d. ft. Poles 3½-in. to 4-in. at butt, 23-ft. and up, 1½d. ft. run; 5-in. to 6-in. at butt, 23-ft. and up, 2½d. ft. run.

SECONDHAND SCAFFOLD POLES generally in stock. Light, 3½-in. to 4-in. at butt, from 1½d. ft. run; heavy, 5-in. to 6-in. at butt, from 1½d. ft. run.

SECONDHAND SCAFFOLD OR RUNNING PLANKS generally in stock but not always in every size.

7 × 2—1½d. ft. lineal.	7 × 3—2d. ft. lineal.	Mixed length price.
8 × 2—1½d. "	8 × 3—2½d. "	Selected lengths may be a
9 × 2—2d. "	9 × 3—2½d. "	little extra cost. Price for
10 × 2—2½d. "	10 × 3—3d. "	new planks on application
11 × 2—2½d. "	11 × 3—3½d. "	

SECONDHAND LOGS, BEAMS, HALF-LOGS from 1/- cubic ft. Sleepers and Putlogs—prices and details on application. At the time of issue of this list, January 1st, 1912, we have in stock logs nearly as good as new from 20-ft. to 58-ft. about 12 × 12 to 14 × 14 Oregon. Price under 30-ft., 1/8 cubic ft., 30-ft. to 45-ft., 1/11; over 45-ft., 2/2 cubic ft.

LONG SECONDHAND LOGS also in stock, 73 to 85-ft. long, 18 × 18 to 24 × 24 Oregon Pine, from 2/8 cubic ft.

Send for details of our up-to-date stock list, stating what size you require, but giving the option of several lengths or sizes where possible.

We do not hold ourselves responsible for the quality of any secondhand material we offer. The purchaser must inspect, if he wishes to ensure of its suitability, but we will always try to describe the quality as far as we can of any stock we hold, and give you sizes, lengths, etc. on application.

SHEDDING BOARD.—We generally have in stock new and secondhand boarding about 1-in. thick, which we can supply for 1d. to 1½d. per square ft.; also ¾-in. thick at ¾d. to 1½d.; ½-in. thick at ½d. to 1d. The prices would vary according to the quality we held in stock at the time of your enquiry. The widths also would vary from time to time.

CRATEWOOD AND PACKING CASE MATERIAL.—We can supply either stock size boards, or cut off to an exact length, squared at ends.

Approximate Prices per 100 lineal ft. below are for quantities only in 2-ft., 3-ft., and 4-ft. stock lengths, nominal sizes (*i.e.*, finish size is slightly less). If cross-cut square to an exact length, the price may be 10% or 20% extra, to allow for waste and labour. 5-ft. stock lengths would be about 5% extra; 6-ft. lengths about 10% extra. Send details of exact requirements, quantity, lengths, widths and thickness, and we can send special quotations.

HARD WOODS, Etc.

AUSTRIAN OAK.—Special line in stock, ten years' seasoning, for best joinery, about 1/- ft. super as 1-in., in the plank and board. Two to four years' seasoning at lower prices. Prices sent cut to size on application. When Austrian Oak is quoted for we include for supplying oak obtained in or near Austria.

ENGLISH OAK.—Special line in stock, ten years' seasoning, for best joinery, about 9d. ft. super as 1-in., in the plank and board. Two to four years' seasoning at lower figure. Cut to size for rough work from 3/- cubic ft. upwards.

OAK AND MAPLE FLOORING quoted on application.

AMERICAN FIGURED OAK.—Special line, six years' seasoning, $\frac{3}{4}$ -in. thick, 4½d. ft. super; 1-in., 8½d. Also cheaper lines not so long seasoning.

AMERICAN PLAIN OAK. 1-in. thick. 6" to 9" 10" to 12" 13" to 16"
 Two years' seasoning, good selected quality 4d. 4½d. 5½d.
 Two " " " medium " 3½d. 4d. 4¾d.
 Cheap quality for cart bottoms or other cheap class work 3d. 3½d. 4d.
 $\frac{3}{4}$ -in. about 20% less; $\frac{5}{8}$ -in., 25% less; $\frac{1}{2}$ -in., 30% less per ft. super than the price of 1-in.

Hardwood of any description or in any thickness or width quoted on application. Prices cut to size if required.

ROUND DOWELS. 5112 (Hardwood).—These are used for other purposes as well as for dowels. Prices below are at per 1,000 pieces or more (as 5112) of one length and size. On smaller quantities we reserve the right to charge up to 1/- per consignment extra.

On lots of 10,000 pieces we will pay part carriage to some ports and stations.

Diameter is given in fraction of one inch, i.e., $\frac{1}{4}$ -in. equals one quarter of an inch diameter.

Lengths vary from 12-in. to 60-in., but we have not every length always in stock, so give option of several lengths when ordering.

See page 247 for remarks re Special Dowels (as No. 5112) at 6d. extra per 100 ft.

No. 5110-5112.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

C. JENNINGS & CO., Pennywell Road, Bristol.

TEAK.—We have a large quantity of Teak in stock in logs, planks, scantlings, etc., which we can offer as they are, and shall be pleased to arrange for inspection of same at our works, or we shall be pleased to cut same out to sizes as follows. The prices we have given you are approximate, and we do not bind ourselves always to supply at these figures, but give just a general idea for fair average quality.

If anything exceptional is wanted in regard to the selection, we shall be pleased to quote special prices, although the Teak is very good, and fair average quality which it would cut out is generally suitable for most work.

The prices herewith would be the price per ft. super as 1-in. not exceeding the sizes we state, so that if a size you require was above one size it would then be charged at the price for the next highest size above.

Thickness: 1-in. and under.—

Width	2in.	3in.	4in.	6in.	8in.	10in.	12in.	14in.	15in.
9in. long or less	4½d.	4½d.	5d.	5½d.	5½d.	6½d.	7d.	8d.	9d.
1ft. 9in. „	5d.	5½d.	5½d.	5½d.	6d.	7d.	7½d.	8½d.	9½d.
4ft. 6in. „	5d.	5½d.	6d.	6½d.	7d.	7½d.	9d.	10d.	10½d.
9ft. „	5½d.	6d.	6½d.	7d.	8d.	9d.	10d.	11d.	1/-
12ft. „	6d.	6½d.	7d.	7½d.	8½d.	9½d.	10½d.	11½d.	1/0½
15ft. „	6½d.	7d.	7½d.	8d.	9d.	10d.	11d.	1/-	1/1
20ft. „	7d.	7½d.	8d.	8½d.	9½d.	10½d.	11½d.	1/0½	1/1½
21 to 30ft. if in stock	7½d.	8d.	8½d.	9d.	10d.	11d.	1/-	1/1	1/2

All Prices given are at per foot super as 1-in., and cut to your exact requirements. Where sizes must hold up exact off saw 1-16th is charged on width and thickness; therefore state whether exact size or nominal sawn size (1-16th under each way) is required.

Thickness: under 2-in., but over 1-in.—

Width	2in.	3in.	4in.	6in.	8in.	10in.	12in.	14in.	15in.

21 to 30ft. if in stock	11d.	1/-	1/1	1/1½	1/2	1/2½	1/3	1/3½	1/4

3-in. and up to 6-in. generally about 1d. ft. super extra to 2-in.

The Teak this is obtained from has in places plug holes, so that in wide boards and long lengths if you can allow plug holes filled up with a teak plug to be included, we can make a reduction in price.

TEAK OFF-CUTS nearly always in stock. Current prices by the ton quoted on application.

GREENHEART for piles, lock-gates, or for other work where a water-resisting wood is required. This is one of the best water-resisting woods on the market. Send for current quotations.

PITCHPINE.—We have some boards and planks ten years' seasoning for special joinery from 5d. ft. super as 1-in., or we have some in stock so low as 2d. ft. super as 1-in. not so long seasoning, and in smaller sizes. State your smallest size you require.

PITCHPINE LOGS quoted on application to any sizes for piles or general work.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

ALDER PLYWOOD.

We keep one of the most varied stocks in the United Kingdom. We have Plywood in stock from $\frac{1}{8}$ -in. thick up to 1-in. thick—some 3-ply, some 5-ply, and some with about 15-ply, as in the case of the 1-in.

"A" quality sheets are of a good quality, and are generally satisfactory for any purpose, being free of bad knots.

"Prime" quality sheets, which we mention at 10% extra, are of a quality which would only be required for exceptionally good work.

We have sizes such as 47 x 22 and 23, 54 x 22 and 23, and one hundred other mixed sizes which could be supplied generally as cheap as the 42 x 42 mentioned below. We generally have small pieces from 6-in. x 6-in. to 18-in. x 16-in. at low prices.

Thicknesses mentioned on this page, either in millimetres (mm.) or fraction of inch, are approximate only. Prices are at per 100-ft. super.

"A" QUALITY. Approximate size of sheets with few other sizes in same. If special sizes are required it should be specially emphasised (option of sizes preferred)	3 M/M $\frac{1}{8}$ in.	4 M/M $\frac{3}{16}$ in.	5 M/M $\frac{1}{4}$ in. bare	6 M/M $\frac{1}{4}$ in.	8 M/M $\frac{5}{16}$ in.	9 M/M $\frac{3}{8}$ in.
	per 100ft. Tel. super code	per 100ft. Tel. super code	per 100ft. Tel. super code	per 100ft. Tel. super code	per 100ft. Tel. super code	per 100ft. Tel. super code
42 x 42 or near size	6/2 WJN	6/11 WJR	8/3 WJU	10/3 WJX	14/11 WKF	18/5 WKJ
45 x 36 to 48 x 36	6/5 WJO	7/2 WJS	8/6 WJV	10/9 WJY	15/9 WKG	19/3 WKK
52 x 46 to 58 x 48	6/7 WJP	7/4 WJT	8/9 WJW	11/11 WJZ	16/11 WKH	20/5 WKL

Prime selected quality sheets selected in above sizes, 12½% extra to "A" quality. (Code alter first letter W to P.)

Large size sheets, 72 x 48 and just under 25% extra to sizes mentioned above, with 12½% extra again if prime.

We have not always $\frac{3}{8}$ -in. 3-ply in stock in all sizes, but sometimes $\frac{1}{2}$ -in. 5-ply at 15% extra.

"B" quality (stock sizes on application) slightly discoloured and a little defective, but should suit for common work. One sound face can generally be selected in this "B" quality, but may be a little discoloured on both sides and slightly unstuck in places. Some thicknesses may be out of stock in this quality. 10% less than "A" quality prices above. (Code alter first letter W to B.)

"C" quality (stock sizes on application) only suitable for packing or similar purpose, would be broken generally on two sides and defective. 20% less than "A" quality prices above. (Code alter first letter W to C.)

Birch Plywood, when in stock, at 10% extra to alder.

Above prices are for £2 lots free on rail Bristol. On smaller quantities we reserve the right to charge for packing and consigning 1/- extra on each consignment under £2. Part carriage paid on £5 lot. Special carriage paid quotations for large lines £50, £100, £200 lots, ordered 3 months in advance, for direct shipment to your nearest station or port.

Cut to size orders quoted on knowing your exact quantities and sizes required for your use.

If large quantity of special sizes can be ordered three to six months in advance, a lower quotation may be secured.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

OAK AND ASH PLYWOOD.

Our ash is as good, and is similar to some oak plywood.

ADVANTAGES :—

- (1) Being approximately equal ply, it is very strong oak and ash throughout, far superior to all other plywood. Not a thin layer of hardwood veneered on one side, but thick hardwood each side.
- (2) Material is scraped on one side ready for use.
- (3) Price is low enough to use instead of ordinary oak or ash boards, and the finish is vastly superior.
- (4) 5 mm., i.e., $\frac{1}{4}$ -in. bare material (the usual stock thickness which we always send unless otherwise ordered) would be nearly equal in strength to $\frac{1}{2}$ -in. material. We sometimes have thicker material as quoted below.
- (5) Also this material does not warp with fair use, and the sizes shown here-with will point out to you the large sizes which can be obtained in this material when such is required.

	5 M/M $\frac{1}{4}$ in. bare		6 M/M $\frac{1}{2}$ in. thick		8 M/M $\frac{5}{16}$ in. thick		10 M/M $\frac{3}{8}$ in. full		12 M/M $\frac{1}{2}$ in. thick

We also have sizes above 60 x 48, and above 68 x 40 up to 80 x 48—5% to 20% extra. Prices above are for sheets averaging not more than—ash, 12 square feet; oak, 10 square feet.

We generally have fifty different lengths from 30-in. up to 80-in.; and thirty different widths from 15-in. up to 48-in. wide. Prices free on rail or boat, taking one bundle of about twenty or thirty sheets. Smaller quantities $\frac{1}{2}$ d. to 1d. per ft. extra. Lots of 700 square feet or more carriage paid or part carriage paid to some stations. Special price for £25 and £50 lots—price on application. Plywood polished one side for 3 $\frac{1}{2}$ d. to 4 $\frac{1}{2}$ d. square ft. extra, according to quality and quantity required.

To prevent breaking bundles, we reserve the right to send extra quantity over your order if necessary, unless instructed to the contrary. We reserve the right to charge extra if all large sheets are ordered.

Quality is so good that we will send a sample order on approval, and pay carriage one way and take it back again, if not satisfactory.

Trade Discount to Cabinet Makers on application, stating quantity required, and send trade card for list of our current stock sizes. We have ordinary alder plywood with thin veneers on same, in holly, sycamore, figured oak, mahogany, padouk, coromandel, maple, rosewood, satin walnut, whitewood, burr walnut, black walnut, ash, pitchpine, wainscot oak, satinwood, American ash.

For **Cabinet Makers' Timber**, and Woodwork in general, see following pages, and also index pages.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

TIMBER FOR CABINET MAKERS AND GENERAL WORK.

SPECIAL AMERICAN WHITE.—At special low prices. A little more liable to twist than Canary Whitewood or Pine unless securely and carefully fixed. Boards mixed lengths 10-ft. to 16-ft. long. Quality is very good, practically free of knots.

We have some of the above sizes in stock planed two sides to $\frac{1}{8}$ -in. less. Price will be the same. When planed boards not in stock there would be extra charges for planing up specially if sawn will not do.

SATIN WALNUT.—Good medium quality fit for any ordinary cabinet work, free of bad knots. Same price as prime Hazel Pine, but we cannot always supply such wide boards in Satin, very few kept in stock over 15 inches. State if Satin Walnut required unplanned or planed. Not always in stock planed, in which case specially planed to order extra.

Part carriage paid to some stations on two-ton lots in one consignment.

BIRCH DEALS.—Prices fluctuate according to market from 1 $\frac{1}{4}$ d. to 1 $\frac{3}{4}$ d. per foot super as 1-in. for fair average width. Sawing extra at trade rates, according to quantity.

BIRCH BOARDS.—Narrow, ex deals; also wide, cut ex logs, quoted on application.

AMERICAN ASH.—1-in. boards from 3d. ft. super for medium widths and good medium quality; $\frac{1}{2}$ -in. thick 2d. ft. super.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

TABLE LEGS (No. 5105). WASHSTAND LEGS (No. 5108).—Prices the same, but Tel. Code below is for No. 5105. If No. 5108, Washstand Legs, code alter first letter M to A.

Height about 28-in., unless otherwise stated. If 3-ft. legs required, cost would be about 20% extra to prices mentioned below. Prices are at per set. Part carriage paid on large quantities to some stations.

Separate sheets of Turned Wood suitable for cabinet making will be sent on application.

	Deal		Birch		Satin Walnut		Mahogany	
	Price	Tel. code	Price	Tel. code	Price	Tel. code	Price	Tel. code
2-in. ..	11d.	MEE	1/5	MEJ	1/11	MEN	3/-	MEP

3-in. ..	1/6	MEG	2/6	MEL	—	—	6/3	MES
4-in. ..	2/11	MEH	4/9	MEM	—	—	10/6	MET

Prices for couch feet (stumps), as No. 5109, or for legs, No. 5106 and No. 5107, on application, stating sizes and quantity required.

DOWELS. See prices, page 242.

We also can supply them with a V-grooved in same as No. 5110 for 6d. per 100 ft. extra.

No. 5110 and 5112.

There is a great advantage in having these dowels worked in this manner. The air can find its way out, and will save work being faulty and split. How often does a dowel split the work through the pressure of the air when you drive in the dowel? Also a saving of time is effected. The dowel being driven easier when the pressure of air is allowed to escape.

COMPO BOARD.—Brown cardboard on two outsides, timber in centre, used for interior work in exhibition and wood houses, where damp is not likely to be excessive. Quick method of fixing partitions. Size of sheets about 8-ft. to 14-ft. long × 2-ft. 6-in. wide. Ask for sizes in stock, as stock sizes change. We sometimes have longer and wider sheets about ¾-in. thick.

Plain	3½d. square ft.	MEU
Ornamental striped on one side	3½d. " "	MEV
Ornamental pattern on one side	4½d. " "	MEW

RED DEAL ENDS.—Medium quality or selected quality. From 1ft. 6in. rising every 6-in. up to 4-ft. 6-in., and rising every foot from 5-ft. up to 11-ft. Price quoted for any one length or mixed lengths on application. Every thickness from ½-in. up to 4-in., and every width from 2-in. up to 11-in. generally kept in stock. Long lengths also, but we specialise in the short lengths piled separately so as to supply just the lengths you want at a low figure—from 1d. per ft. super as 1-in. (1/- ft. cubic).

MAHOGANY.
The price will depend upon quantity, widths and quality required.

	Light Colour.	Darker Colour.
Planks from 4½d. ft. super as 1-in.		From 5½d.
Boards 1-in. 5½d. "		6½d.
" ¾-in. 4½d. "		5½d.
" ¾-in. 3½d. "		4d.

Special line of 10 × 3 2nd Archangel White, extra good, 4d. ft. lineal. Quality is excellent, suitable for nearly any work. We can cut these up into 1-in. or ¾-in. boards, sawing 2/6 per 100 ft. super, or planing, 2/- per square of planing measuring superficial surface planed. These are used extensively for table tops, etc., in place of pine, now good pine is so expensive.

PINE DEALS.—Special cheap line, medium quality, suitable for ordinary cabinet work. 7 to 10 × 3, 1½d. ft. super as 1-in.; 11 × 3, 1½d.; 12 and up × 3-in., 2d. Prices for selected quality pines or cut to size on application.

Any description of bend can be given up to 8-in. rise and 5-in. side sweep in each shaft. Bends over these sizes are charged extra. When one shaft only is ordered an extra charge is made.

Bent shafts will always be sent unless otherwise ordered.

Directions for Measurements of Shafts—

For Rise of Shaft.—Give depth from crown of shaft to straight line from back of shaft.

For Side Cant.—Give width in between, at back end (A), bar (B), and at tugs (C).

We can supply Greenheart and Lancewood Shafts—prices on application.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

HASKIN'S

No. 4 Improved (Patent)

"SMOKURE"

**Chimney Pot
and Ventilator,**

The DADDY (Regd. Trade Mark).

Price 20/- (In Buff Terra Cotta)

No. 5122.

In Salt-Glazed Stoneware or Red, 3/- extra.

No. 5121.

Can you sweep every inch of your pot like this?

No. 5122 shows how our pot may be swept from the ground.

When sending remittance include 1/6 for crate for each 4-ft. pot ordered. Timber only in crate is worth the value, but if crate is returned carriage paid, this 1/6 will be refunded. If 6-ft. pot is ordered include 3/- for two crates, as 6-ft. pot is in two pieces. 6-ft. pots are 25/- (Buff).

**PRINTED GUARANTEE & FREE TRIAL
WITH EVERY POT.**

Money returned if pot is returned carriage paid and unbroken any time within one month of date you receive same from us.

Testimonials can be seen on application.

EXPLANATION OF ACTION.

Through the openings B any side or down blow rushes with greatly increased velocity in an upward direction. This effect is further assisted by the sloping rings C, especially ring C3, which compresses and drives any wind upwards with tremendous force. The flat ring D acts in a twofold capacity. The spaces E between them readily allow for the egress of ALL the smoke if desired, while any down, side, or slanting blow on these rings is converted into a cross current, which carries away the smoke with it, and also materially increases the draught in the chimney below. This continual flow of wind in the upper part also blows away any soot which may rest on the surfaces of the rings, thus keeping the pot clear and free from corrosion. The top opening F may be stoppered in, or not, as desired. Owing to the shape of the cover H, the brush is gently checked, and there is no fear of this part being broken.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

No. 5126.

"SMOKURE"

No. 6 Improved Design (Patent).

Is an improvement in several respects on our No. 4, which has proved such a tremendous success.

Much Lower Cost.

Greater Efficiency.

Much More Compact.

See sizes on drawing.

Less Weight.

No. 5127.

No. 5127 1/- extra to pattern No. 5126.

The principle is the same, viz., to intercept any wind blowing in a downward direction towards the mouth of the flue, by means of plates which, at the same time, deflect it across the mouth of the flue with considerably increased velocity. In this pot there are two deep branch openings, C1—C, while the pot is enclosed everywhere else. These openings are tapered so as to increase the wind power, and in them are placed baffle plates—D, D. The openings between the baffle plates are large—each opening being about 8 x 4in.; there are, therefore, no small places to clog. The dotted lines, X, Y, Z., are imaginary lines drawn to represent wind blowing in the most extreme possible downward direction from the outer ends of the branches C. It will be seen that no wind can possibly enter the flue in a downward direction, as in every case the baffle plates intercept and guide the wind upwards or across. If the wind is blowing broadside on to the pot, both branches act as powerful extractors: at any other angle one branch acts as an extractor, and the other as a wind compressor. This arrangement causes an even more powerful up-draught than our No. 4. The pot is so designed that it may be used on the stack itself, or slipped on to any already erected, or on tallboys to lengthen the stack.

Look well at these Pots in section. We defy anyone to show how down-draught can enter it. This pot not only counteracts down-draught, but it prevents it from entering the flue at all.

CLOSET SEATS.

Plain W.C. Seats with Turned Cover (No. 5221), 36 × 17 or 18-in., 3/- each. Wider at proportionate price.

No. 5221

Ordinary good quality for paintwork, free of knots except an occasional pin knot.

Odd length laths not mentioned above can be cut, however, to any exact length, charged about 2-in. extra in length, *i.e.*, if you want 2-ft. 1-in., it would be charged as 2-ft. 3-in. at the price per 1,000-ft. of 2-ft. 6-in. laths, or 3-ft. 2½-in. charged as 3-ft. 5-in. at the price of 3-ft. 6-in. laths, or other lengths based on the same rule.

No. 5236.

No. 5237.

No. 5238.

Half-size (approximate).

We will supply mixed laths at 17/6 per 1,000 feet (Code: V B G), include about:—

- 10% 1-ft. 6-in. and 2-ft.
- 25% 2-ft. 6-in. and 3-ft.
- 25% 3-ft. 6-in. and 4-ft.
- 20% 4-ft. 6-in. and 5-ft.
- 10% 6-ft.
- 10% 8 ft.

Above prices are for ordinary quality. Selected quality for stain and varnished 12½% extra. Code alter first letter V to O.

Kindly always order in the shortest lengths possible to facilitate delivery and obtain the advantage in price. Above prices are for 1,000 feet or more (total of laths and rails).

Part Carriage paid to some stations and ports in United Kingdom on 50,000 feet lots. We will quote for any quantity carriage paid on receipt of enquiry, stating quantity required.

Shop Front Blind Rails to Pattern No. 5239 on page 255, size 4 x 1½, 1½d. foot; 5 x 1½, 3d. foot; 6 x 1½, 3½d. foot; up to 17-ft. long. Over 17-ft. may be a little extra cost, and also it is sometimes difficult to get Railway Carriers to take over 17-ft. without extra charge on carriage.

Before writing out an Enquiry or Order, kindly read through Pages 1 to 8.

VENETIAN BLINDS (Wood Laths).

Painted any Colour, or Stained and varnished, 5½d. per square ft. (14-ft. minimum to each blind).
Best Quality, 6d. per square ft. ditto ditto
If fitted with **Patent Check Actions** (to stop blinds at any height, requiring neither hook or knobs), 1d. per square ft. extra.

When sending sizes state clearly if they are taken at A. 5242 between beads of window as required if you intend to hang blind to head of window, or as 5242B (size clear of pulley styles overall of beads) if you prefer brackets. When measuring height of blind for brackets allow 2-in. above the head bead, and 1-in. below the sill bead.

No. 5241.

If you order the blinds with your windows we shall be able to enter sizes before the windows leave our works.

No. 5242.

We recommend **Blinds fixed on Brackets** wide enough to cover beads, as No. 5242B; they secure more privacy, obstructing the slightest view from outside when closed, and securing a fuller amount of light than those screwed to underside of head when drawn right up. They also drop clear of the sashes, and thus avoid a lot of inconvenience and wear and tear.

No. 5239.

Nos. 5243-5249.

No. 5249.—**Cord Holders—Brass.**—1/- per doz.; better quality, 2/3 per doz.

4	4	3 1/4	12/3 WFW	14/6 WGL	4/-	5/11	2/4	4/3	6/2

Casings can be painted with asbestos paint at same price as for white lead paint. One-groove or 3-groove casings quoted on application, or special patterns worked; but it is always a little more costly to work to a customer's pattern, unless a large quantity is ordered, say 10,000 ft. of a size.

Cappings only supplied at half of the above prices. Casings only supplied at threequarters of the above prices.

Trade Discounts for quantities on application to bona-fide Electrical Contractors.

TROUGHING.

Creosoted for Underground Cables, Waterpipes, etc., price per yard including Trough and Cover of 3-in. nominal thickness timber. Our option to make it either of spruce or red deal, or as 5296 or 5297, unless specially arranged.

5295, 5296.

CREOSOTED BY DIPPING. Prices are at per yard.

HARDWOOD CABLE BRIDGES.

Two to the yard. Generally inserted to keep cable up off bottom of trough. No. 5297.

Prices per 1,000 Bridges.

Prepared for Width of Trough not exceeding.	Prepared with one groove for one cable.		Prepared with two grooves for two cables.		Prepared with three grooves for three cables.	
		Tel. Code.		Tel. Code.		Tel. Code.
For 1 1/2-in.	12/-	WHL	14/-	WHT	16/-	WJF
" 2-in.	13/6	WHM	15/9	WHU	18/-	WJG
" 2 1/4-in.	14/3	WHN	16/9	WHV	19/3	WJH
" 2 1/2-in.	15/-	WHO	17/9	WHW	20/6	WJJ
" 2 3/4-in.	15/9	WHP	18/9	WHX	21/9	WJK
" 4-in.	19/6	WHR	22/9	WHY	26/-	WJL
" 5-in.	22/6	WHS	26/-	WHZ	29/6	WJM

Prices quoted for Bridges are for not less than 2,000 of a sort.

Creosoting by dipping is not so thorough as creosoting by force at 120 lb. pressure to the square inch, which will force the creosote well into the timber, at an extra cost for creosoting by force of about 10 to 15%.

Nominal measure means a little under size, as is usual in the timber trade, where material is sawn or planed to special sizes.

This casing can be bundled for export. Creosoted troughing can be packed (for export to save cost of carriage) in the knockdown all ready for nailing together on site.

" RUBEROID " ROOFING.

The invention of " Ruberoid " Roofing in 1891 and its immediate success created an entirely new class of roof coverings. This class of roofings can be best described as smooth surfaced, prepared, flexible roofings. The utility of Ruberoid Roofing cannot be too fully emphasised, as there is no roof work for which it cannot be used.

Its low cost, however, enables it to be economically used on Bungalows, Farm Buildings, Workshops, Stables, Garages, Engine Sheds, Factories, Public Buildings, and other structures on which a perfectly weatherproof roofing is required.

With age Ruberoid improves by becoming harder and more " leathery." The moisture in the saturation never dries out, and it always retains its flexibility and elasticity. The first roofs covered 20 years ago are still giving entire satisfaction, and show no signs of deterioration.

ADVANTAGES :—

Is made in three colours—Grey, Red, and Green.

Is odourless, and does not contaminate water. Rainwater collected from Ruberoid roofs can be used for domestic purposes.

Is damp and dust proof.

Will outlast iron or zinc.

Does not require tarring or painting.

No Metal Flashings required.

PRICE LIST.

Every roll of Ruberoid Roofing contains sufficient material to cover two squares (200 sq. ft.). Sixteen extra square feet are included with each roll to allow for laps, waste etc.

Galvanized Clout Nails and Ruberoid Cement for making the seams are included in the prices given below. (Wire Nails 2 lb. and Tincaps 1½ lb., instead of Galvanized Clouts can be supplied if specially ordered.)

All Ruberoid Roofings and Sarking Felt are 36 in. wide. There are 72 lin. ft. in each roll.

Price per roll to cover 200 sq. ft. of roof, including the following quantity of Accessories (3½ lb. 1-in. nails, or 2½ lb. ¾-in. nails, and 1 quart Ruberoid Cement) :—

Standard Ruberoid Roofing (Grey), Price per Roll : ½-ply, 17/4 ; 1-ply, 20/6 ; 2-ply, 26/6 ; 3-ply, 34/6.

Red Ruberoid (made in one thickness only)	per Roll	36/-
Green	"	39/-

Half-rolls (100 sq. ft.) can be supplied if specially ordered.

Extra Accessories supplied, if required, at the undermentioned prices :—

Nails : 1-in. Galvanized Clout Nails, 6d. per lb. ; also ¾-in., 6d. lb.
1-in. Wire Nails (for use with Tincaps), 3d. per lb. ;

Tincaps, 6d. lb.

Ruberoid Sarking Felt (no Accessories supplied) :—

In rolls of 24 sq. yds. made in one thickness, per roll 13/6.

Roofing Knives, suitable for cutting Ruberoid, each 1/6.

ROOFING FELT and DAMP COURSE FELT quoted on application.

"ONNEJ" Patent GUTTER BRACKETS.

For O.G. GUTTERS. With or without Clip ready for bending over the front of the Gutter as an additional security.

This Bracket has the special advantage of increasing the capacity of the Gutter.

PRICES	For O.G. Gutters.		For Half-round Gutters.		*4-inch.	*4½-inch.
	...	No. 1125	...	No. 1123 without Clip	17/6	20/- gross
		No. 1126	...	No. 1124 with Clip	20/6	23/- "

*Other sizes now in course of preparation.

Extra if Galvanized, 4-inch, 5/- gross; 4½-inch, 5/6 gross.

O.G. Gutter as usually fixed, front edge low. CAPACITY REDUCED.

O.G. Gutter, with "ONNEJ" Bracket giving FULL CAPACITY.

EXPORT ORDERS.

The lightness of the "ONNEJ" Bracket is important to Exporters; a gross of 4-in. only weighs about 33-lb.

The "ONNEJ" is undoubtedly the **Strongest Bracket obtainable**; in fact four times as strong as any Gutter Bracket yet known.

The "ONNEJ" is stamped from a single piece of Steel.

The "ONNEJ" has no rivetting or welding.

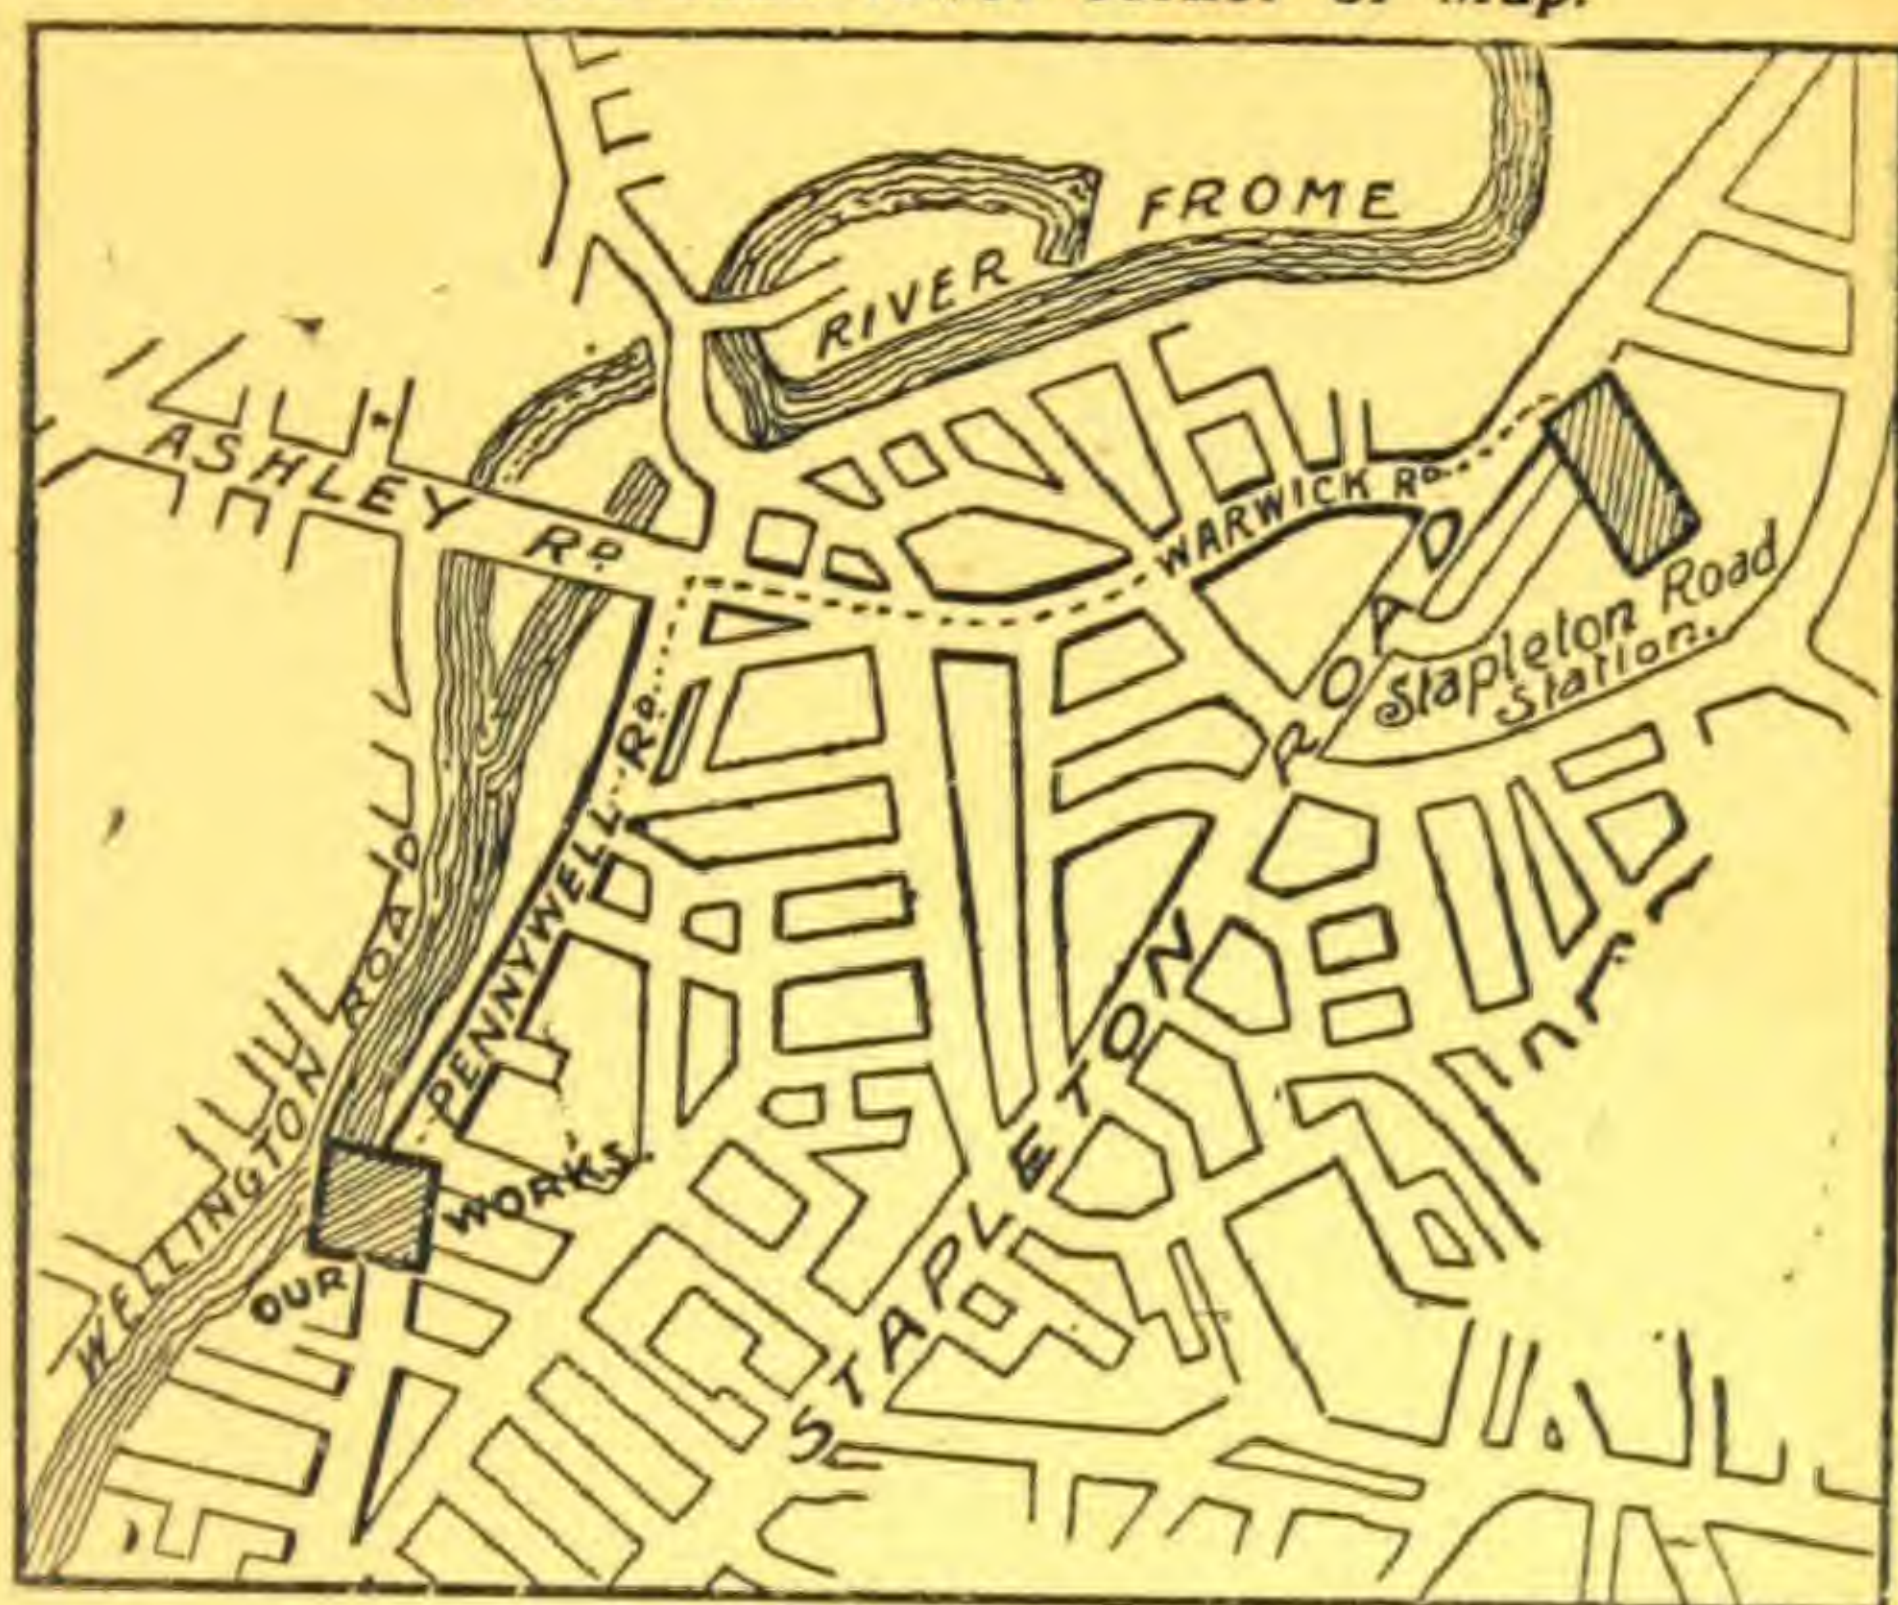

The "ONNEJ" gives the Gutter a perfect **Bearing**. In many brackets the gutter merely rests on a rivet head used for securing the half-round portion to the bottom strengthening stay; as a consequence the gutter is "shifty."

The "ONNEJ" has a **spike at back**. A few taps with a hammer and the bracket is held in position, allowing the workman to use both hands when screwing up.

The "ONNEJ" is **neat**, and of good appearance when fixed.

C. JENNINGS & CO.'s WORKS

See left-hand lower corner of Map.

To Reach C. JENNINGS & CO.'s Head Office and Works

If arriving at Stapleton Road Station (our nearest station, where a large number of trains from Wales, North of England, London, etc. stop before reaching Bristol main station). Five minutes walk, or take Warwick Road tramcar and alight at end of Pennywell Road.

If arriving at Temple Meads Station (Bristol main station), take train to Stapleton Road Station if there is an immediate service, or take Hanham car as far as Old Market Street, changing over to Eastville car and alight in Stapleton Road end of Clark Street, pass through Clark Street and Plummer Street to our Works.

THE MARVEL of the AGE in WOODWORK CATALOGUES

COPYRIGHT

Owing to the enormous expense we have incurred in issuing this most up-to-date list, which will cost us nearly £2,000 in all to prepare and distribute, which in our estimation, can be taken as a standard list in preference to any list in the world—fully illustrated and priced 264 pages—we have decided to ask our friends to send P.O. 1/6 (export 3d. extra) and we will post a copy to any part of the world together with 4-fold brass-jointed rule, and if both are not worth 2/6 to you, kindly return same and we will refund money paid and any postage incurred to return same.

**C. JENNINGS & CO., Timber Merchants, General Woodworkers,
Pennywell Road, BRISTOL.**

If our list is not the best Estimating Book in the world for Builder's Woodwork we do not wish you to keep it.
